No person has been authorized to give any information or to make any representations other than those contained in this SAI and the Prospectuses dated February 28, 2011 and, if given or made, such information or representations may not be relied upon as having been authorized by the Trust or the Funds.

This SAI does not constitute an offer to sell securities.

FUND HISTORY AND CLASSIFICATION

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on October 3, 1996. The Trust's Agreement and Declaration of Trust (the "Declaration of Trust") permits the Trust's Board of Trustees (the "Board" or the "Trustees") to issue an unlimited number of full and fractional shares of beneficial interest, par value \$0.01 per share, which may be issued in any number of series. The Trust consists of various series that represent separate investment portfolios. The Board may from time to time issue other series, the assets and liabilities of which will be separate and distinct from any other series.

Registration with the Securities and Exchange Commission ("SEC") does not involve supervision of the management or policies of the Funds. The Prospectuses and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee. The Funds commenced operations on December 31, 2010.

Diversification

Each Fund is diversified. Under applicable federal securities laws, the diversification of a mutual fund's holdings is measured at the time the Fund purchases a security. This means that, as to 75% of a Fund's total assets (1) no more than 5% may be invested in the securities of a single issuer, and (2) the Fund may not hold more than 10% of the outstanding voting securities of a single issuer. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund's total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers. In that case, the Fund would be subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities despite the Fund qualifying as a diversified fund under applicable federal securities laws.

Percentage Limitations

Whenever an investment policy or limitation states a maximum percentage of a Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standards or percentage limitation will be determined immediately after and as a result of the Fund's acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered in determining whether an investment complies with the Fund's investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not buy. If this happens the Fund would take such action as is reasonable given the Fund's objective.

Recent Regulatory Events

The U.S. Government, the Federal Reserve, the Treasury, the SEC, the Federal Deposit Insurance Corporation and other governmental and regulatory bodies have recently taken or are considering taking actions to address the financial crisis. These actions include, but are not limited to, the enactment by the United States Congress of the "Dodd-Frank Wall Street Reform and Consumer Protection Act," which was signed into law on July 21, 2010, and imposes a new regulatory framework over the U.S. financial services industry and the consumer credit markets in general, and proposed regulations by the SEC. Given the broad scope, sweeping nature, and relatively recent enactment of some of these regulatory

measures, the potential impact they could have on securities held by the Funds is unknown. There can be no assurance that these measures will not have an adverse effect on the value or marketability of securities held by the Funds. Furthermore, no assurance can be made that the U.S. Government or any U.S. regulatory body (or other authority or regulatory body) will not continue to take further legislative or regulatory action in response to the economic crisis or otherwise, and the effect of such actions, if taken, cannot be known.

The discussion below supplements information contained in the Funds' Prospectuses as to investment policies of the Funds.

High Yield and Other Securities

Each Fund will invest in debt securities, including bonds and debentures (which are long-term) and notes (which may be short- or long-term). Each Fund will invest in securities that are rated below investment grade or non-rated. Investments in high yield securities (*i.e.*, less than investment grade), while providing greater income and opportunity for gain than investments in higher-rated securities, entail relatively greater risk of loss of income or principal. Lower-grade obligations are commonly referred to as "junk bonds." Market prices of high-yield, lower-grade obligations may fluctuate more than market prices of higher-rated securities. Lower grade, fixed income securities tend to reflect short-term corporate and market developments to a greater extent than higher-rated obligations which, assuming no change in their fundamental quality, react primarily to fluctuations in the general level of interest rates.

Each Fund may purchase unrated securities. Unrated securities may be less liquid than comparable rated securities and involve the risk that the portfolio manager may not accurately evaluate the securities comparative credit rating.

The high yield market at times is subject to substantial volatility. An economic downturn or increase in interest rates may have a more significant effect on high yield securities and their markets, as well as on the ability of securities' issuers to repay principal and interest. Issuers of high yield securities may be of low creditworthiness and the high yield securities may be subordinated to the claims of senior lenders. During periods of economic downturn or rising interest rates the issuers of high yield securities may have greater potential for insolvency and a higher incidence of high yield bond defaults may be experienced.

The prices of high yield securities have been found to be less sensitive to interest rate changes than higher-rated investments but are more sensitive to adverse economic changes or individual corporate developments. During an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals, and to obtain additional financing. If the issuer of a high yield security owned by a Fund defaults, the Fund may incur additional expenses in seeking recovery. Periods of economic uncertainty and changes can be expected to result in increased volatility of the market prices of high yield securities and a Fund's NAV per share. Yields on high yield securities will fluctuate over time. Furthermore, in the case of high yield securities structured as zero coupon or pay-in-kind securities, their market prices are affected to a greater extent by interest rate changes and therefore tend to be more volatile than the market prices of securities which pay interest periodically and in cash.

Certain securities held by each Fund including high yield securities, may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, a Fund would have to replace the security with a lower yielding security, resulting in a decreased return for the investor.

Conversely, a high yield security's value will decrease in a rising interest rate market, as will a Fund's net assets.

The secondary market for high yield securities may at times become less liquid or respond to adverse publicity or investor perceptions making it more difficult for each Fund to accurately value high yield securities or dispose of them. To the extent a Fund owns or may acquire illiquid or restricted high yield securities, these securities may involve special registration responsibilities, liabilities and costs, liquidity difficulties, and judgment will play a greater role in valuation because there is less reliable and objective data available.

Special tax considerations are associated with investing in high yield bonds structured as zero coupon or pay-in-kind securities. The Funds will report the interest on these securities as income even though it receives no cash interest until the security's maturity or payment date. Further, the Funds must distribute substantially all of its income to its shareholders to qualify for pass-through treatment under the tax law. Accordingly, a Fund may have to dispose of its portfolio securities under disadvantageous circumstances to generate cash or may have to borrow to satisfy distribution requirements.

Credit ratings evaluate the safety of principal and interest payments, not the market value risk of high yield securities. Since credit rating agencies may fail to timely change the credit ratings to reflect subsequent events, the Adviser monitors the issuers of high yield securities in the portfolio to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments, and to attempt to assure the securities' liquidity so the Fund can meet redemption requests. To the extent that a Fund invests in high yield securities, the achievement of its investment objective may be more dependent on the Adviser's credit analysis than would be the case for higher quality bonds. The Funds may retain a portfolio security whose rating has been changed.

Loan Participations and Assignments

Each Fund may purchase participations in commercial loans. Such indebtedness may be secured or unsecured. Loan participations typically represent direct participation in a loan to a corporate borrower, and generally are offered by banks or other financial institutions or lending syndicates. A Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing loan participations, a Fund assumes the credit risk associated with the corporate borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which each Fund intends to invest may not be rated by any nationally recognized rating service. Each Fund may invest in debtor-in-possession financings (commonly known as "DIP financings"). DIP financings are arranged when an entity seeks the protections of the bankruptcy court under Chapter 11 of the U.S. Bankruptcy Code. These financings allow the entity to continue its business operations while reorganizing under Chapter 11. Such financings constitute senior liens on unencumbered security (i.e., security not subject to other creditors' claims). There is a risk that the entity will not emerge from Chapter 11 and be forced to liquidate its assets under Chapter 7 of the U.S. Bankruptcy Code. In the event of liquidation, a Fund's only recourse will be against the property securing the DIP financing. A loan is often administered by an agent bank acting as agent for all holders. The agent bank administers the terms of the loan, as specified in the loan agreement. In addition, the agent bank is normally responsible for the collection of principal and interest payments from the corporate borrower and the apportionment of these payments to the credit of all institutions which are parties to the loan agreement. Unless, under the terms of the loan or other indebtedness, a Fund has direct recourse against the corporate borrower, the Fund may have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies against a corporate borrower. A financial institution's employment as agent bank might be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor agent bank

would generally be appointed to replace the terminated agent bank, and assets held by the agent bank under the loan agreement should remain available to holders of such indebtedness. However, if assets held by the agent bank for the benefit of a Fund were determined to be subject to the claims of the agent bank's general creditors, a Fund might incur certain costs and delays in realizing payment on a loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (*e.g.*, an insurance company or governmental agency) similar risks may arise. Purchasers of loans and other forms of direct indebtedness depend primarily upon the creditworthiness of the corporate borrower for payment of principal and interest. If a Fund does not receive scheduled interest or principal payments on such indebtedness, the Fund's share price and yield could be adversely affected. Loans that are fully secured offer the Funds more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower's obligation, or that the collateral can be liquidated. A Fund may invest in loan participations with credit quality comparable to that of issuers of its securities investments. Indebtedness of companies whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. Some companies may never pay off their indebtedness, or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, the Funds bear a substantial risk of losing the entire amount invested.

Each Fund is diversified and limits the amount of its total assets that it will invest in any one issuer and a Fund limits the amount of its total assets that it will invest in issuers within the same industry (see "Investment Restrictions"). For purposes of these limits, a Fund generally will treat the corporate borrower as the "issuer" of indebtedness held by the Fund. In the case of loan participations where a bank or other lending institution serves as a financial intermediary between a Fund and the corporate borrower, if the participation does not shift to the Fund the direct debtor-creditor relationship with the corporate borrower, SEC interpretations require a Fund to treat both the lending bank or other lending institution and the corporate borrower as "issuers." Treating a financial intermediary as an issuer of indebtedness may restrict the Funds' ability to invest in indebtedness related to a single financial intermediary, or a group of intermediaries engaged in the same industry, even if the underlying borrowers represent many different companies and industries. Loans and other types of direct indebtedness may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of indebtedness may require weeks to complete. Consequently, some indebtedness may be difficult or impossible to dispose of readily at what PIA believes to be a fair price. In addition, valuation of illiquid indebtedness involves a greater degree of judgment in determining a Fund's net asset value than if that value were based on available market quotations, and could result in significant variations in the Fund's daily share price. At the same time, some loan interests are traded among certain financial institutions and accordingly may be deemed liquid. As the market for different types of indebtedness develops, the liquidity of these instruments is expected to improve. In addition, each Fund currently intends to treat indebtedness for which there is no readily available market as illiquid for purposes of a Fund's limitation on illiquid investments. Investments in loan participations are considered to be debt obligations for purposes of the Trust's investment restriction relating to the lending of funds or assets by a Fund.

Investments in loans through a direct assignment of the financial institution's interests with respect to the loan may involve additional risks to the Funds. For example, if a loan is foreclosed, a Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, a Fund could be held liable as co-lender. It is unclear whether loans and other forms of direct indebtedness offer securities law protections against fraud and misrepresentation. In the absence of definitive regulatory guidance, each Fund relies upon the Adviser's research in an attempt to avoid situations where fraud or misrepresentation could adversely affect the Fund.

Warrants to Purchase Securities

Each Fund may invest in or acquire warrants to purchase equity securities. Warrants are instruments that give the holder the right, but not the obligation, to buy a security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments. Bonds with warrants attached to purchase equity securities have many characteristics of convertible bonds and their prices may, to some degree, reflect the performance of the underlying stock. Bonds also may be issued with warrants attached to purchase additional fixed income securities at the same coupon rate. A decline in interest rates would permit a Fund to buy additional bonds at the favorable rate or to sell the warrants at a profit. If interest rates rise, the warrants would generally expire with no value. The Funds will not invest more than 5% of their net assets in warrants to purchase securities. Warrants acquired in units or attached to securities will be deemed without value for purposes of this restriction.

Illiquid Securities

Each Fund has limited its holdings in illiquid securities to 15% of the value of its net assets. The investments included as illiquid securities are (i) those which cannot freely be sold for legal reasons, although securities eligible to be resold pursuant to Rule 144A under the Securities Act of 1933, as amended, may be considered liquid; (ii) fixed time deposits subject to withdrawal penalties, other than overnight deposits; (iii) repurchase agreements having a maturity of more than seven days; and (iv) investments for which market quotations are not readily available. The Funds do not generally expect to own any investments for which market quotations are not available. However, illiquid securities do not include obligations which are payable at principal amount plus accrued interest within seven days after purchase. The Board has delegated to the Adviser the day-to-day determination of the liquidity of a security although it has retained oversight and ultimate responsibility for such determinations. Although no definite quality criteria are used, the Board has directed the Adviser to consider such factors as (i) the nature of the market for a security (including the institutional private resale markets); (ii) the terms of the securities or other instruments allowing for the disposition to a third party or the issuer thereof (*e.g.*, certain repurchase obligations and demand instruments); (iii) the availability of market quotations; and (iv) other permissible factors. Investing in Rule 144A securities could have the effect of decreasing the liquidity of a Fund to the extent that qualified institutional buyers become, for a time, uninterested in purchasing these securities.

Leverage

From time to time a Fund may increase its ownership of securities by borrowing on a secured or unsecured basis at fixed and floating rates of interest and investing the borrowed funds. It is not anticipated that the Funds will use their borrowing power to an extent greater than 25% of the value of their total assets. Borrowings will be made only from banks and only to the extent that the value of the assets of a Fund, less its liabilities other than borrowings, is equal to at least 300% of all borrowings, after giving effect to the proposed borrowing. If the value of the assets of a Fund so computed should fail to meet the 300% asset coverage requirement, the Fund is required within three days to reduce its bank debt to the extent necessary to meet such 300% coverage. Since substantially all of the assets of the Funds

fluctuate in value, but borrowing obligations may be fixed, the net asset value (“NAV”) per share of each Fund will correspondingly tend to increase and decrease in value more than otherwise would be the case.

Lending Portfolio Securities

Each Fund may, to increase the income, lend its securities on a short- or long-term basis to brokers, dealers and financial institutions if (i) the loan is collateralized in accordance with applicable regulatory guidelines (the “Guidelines”) and (ii) after any loan, the value of the securities loaned does not exceed 25% of the value of its total assets. Under the present Guidelines (which are subject to change) the loan collateral must be, on each business day, at least equal to the value of the loaned securities and must consist of cash, bank letters of credit or U.S. Government securities. To be acceptable as collateral, a letter of credit must obligate a bank to pay amounts demanded by a Fund if the demand meets the terms of the letter of credit. Such terms and the issuing bank would have to be satisfactory to the Funds. Any loan might be secured by any one or more of the three types of collateral. Each Fund currently expects to invest the collateral received in government money market funds, agency securities, or the highest quality commercial paper.

Each Fund receives amounts equal to the interest or other distributions on loaned securities and also receives one or more of the negotiated loan fees, interest on securities used as collateral or interest on the securities purchased with such collateral, either of which type of interest may be shared with the borrower. Each Fund may also pay reasonable finder’s, custodian and administrative fees but only to persons not affiliated with the Trust. The Funds will not have the right to vote securities on loan, but the terms of the loan will permit a Fund to terminate the loan and thus reacquire the loaned securities on three days’ notice.

The primary risk in securities lending is a default by the borrower during a sharp rise in price of the borrowed security resulting in a deficiency in the collateral posted by the borrower. Each Fund will seek to minimize this risk by requiring that the value of the securities loaned be computed each day and additional collateral be furnished each day if required. In addition, the Funds are exposed to the risk of delay in recovery of the loaned securities or possible loss of rights in the collateral should the borrower become insolvent. As well, all investments made with the collateral received are subject to the risks associated with such investments. If such investments lose value, the Funds will have to cover the loss when repaying the collateral.

Hedging Instruments

Each Fund may engage in hedging. Hedging may be used in an attempt to (i) protect against declines or possible declines in the market values of securities held in a Fund’s portfolio (“short hedging”) or (ii) establish a position in the securities markets as a substitute for the purchase of individual securities (“long hedging”). A Fund so authorized may engage in short hedging in an attempt to protect that Fund’s value against anticipated downward trends in the securities markets or engage in long hedging as a substitute for the purchase of securities, which may then be purchased in an orderly fashion. It is expected that when a Fund is engaging in long hedging, it would, in the normal course, purchase securities and terminate the hedging position, but under unusual market conditions such a hedging position may be terminated without the corresponding purchase of securities. The various hedging instruments which a Fund may use are discussed below.

Options on Securities

An option is a legal contract that gives the buyer (who then becomes the holder) the right to buy, in the case of a call, or sell, in the case of a put, a specified amount of the underlying security at the option price at any time before the option expires. The buyer of a call obtains, in exchange for a premium that is paid to the seller, or “writer,” of the call, the right to purchase the underlying security. The buyer of a put obtains the right to sell the underlying security to the writer of the put, likewise in exchange for a premium. Options have standardized terms, including the exercise price and expiration time; listed options are traded on national securities exchanges that provide a secondary market in which holders or writers can close out their positions by offsetting sales and purchases. The premium paid to a writer is not a down payment; it is a nonrefundable payment from a buyer to a seller for the rights conveyed by the option. A premium has two components: the intrinsic value and the time value. The intrinsic value represents the difference between the current price of the securities and the exercise price at which the securities will be sold pursuant to the terms of the option. The time value is the sum of money investors are willing to pay for the option in the hope that, at some time before expiration, it will increase in value because of a change in the price of the underlying security.

One risk of any put or call that is held is that the put or call is a wasting asset. If it is not sold or exercised prior to its expiration, it becomes worthless. The time value component of the premium decreases as the option approaches expiration, and the holder may lose all or a large part of the premium paid. In addition, there can be no guarantee that a liquid secondary market will exist on a given exchange, in order for an option position to be closed out. Furthermore, if trading is halted in an underlying security, the trading of options is usually halted as well. In the event that an option cannot be traded, the only alternative to the holder is to exercise the option.

Call Options on Securities. When a Fund writes a call, it receives a premium and agrees to sell the related investments to the purchaser of the call during the call period (usually not more than nine months) at a fixed exercise price (which may differ from the market price of the related investments) regardless of market price changes during the call period. If the call is exercised, the Fund forgoes any gain from an increase in the market price over the exercise price.

To terminate its obligation on a call which it has written, the Fund that wrote the call may purchase a call in a “closing purchase transaction.” A profit or loss will be realized depending on the amount of option transaction costs and whether the premium previously received is more or less than the price of the call purchased. A profit may also be realized if the call lapses unexercised, because the Fund that wrote the call retains the premium received. All call options written by a Fund must be “covered.” For a call to be “covered” (i) the Fund must own the underlying security or have an absolute and immediate right to acquire that security without payment of additional cash consideration; (ii) the Fund must maintain cash or liquid securities adequate to purchase the security; or (iii) any combination of (i) or (ii).

When a Fund buys a call, it pays a premium and has the right to buy the related investments from the seller of the call during the call period at a fixed exercise price. The Fund that bought the call benefits only if the market price of the related investment is above the call price plus the premium paid during the call period and the call is either exercised or sold at a profit. If the call is not exercised or sold (whether or not at a profit), it will become worthless at its expiration date, and that Fund will lose its premium payment and the right to purchase the related investment.

Put Options on Securities. When a Fund buys a put, it pays a premium and has the right to sell the related investment to the seller of the put during the put period (usually not more than nine months) at a fixed exercise price. Buying a protective put permits a Fund to protect itself during the put period against a

decline in the value of the related investment below the exercise price by having the right to sell the investment through the exercise of the put.

When a Fund writes a put option it receives a premium and has the same obligations to a purchaser of such a put as are indicated above as its rights when it purchases such a put. A profit or loss will be realized depending on the amount of option transaction costs and whether the premium previously received is more or less than the put purchased in a closing purchase transaction. A profit may also be realized if the put lapses unexercised, because the Fund retains the premium received. All put options written by the Funds must be “covered.” For a put to be “covered,” the Funds must maintain cash or liquid securities equal to the option price.

Debt Futures

Each Fund may invest in futures contracts on debt securities (“Debt Futures” or “Futures”) or options on Debt Futures.

A futures contract is a commitment to buy or sell a specific product at a currently determined market price, for delivery at a predetermined future date. The futures contract is uniform as to quantity, quality and delivery time for a specified underlying product. The commitment is executed in a designated contract market – a futures exchange – that maintains facilities for continuous trading. The buyer and seller of the futures contract are both required to make a deposit of cash or U.S. Treasury Bills with their brokers equal to a varying specified percentage of the contract amount; the deposit is known as initial margin. Since ownership of the underlying product is not being transferred, the margin deposit is not a down payment; it is a security deposit to protect against nonperformance of the contract. No credit is being extended, and no interest expense accrues on the non-margined value of the contract. The contract is marked to market every day, and the profits and losses resulting from the daily change are reflected in the accounts of the buyer and seller of the contract. A profit in excess of the initial deposit can be withdrawn, but a loss may require an additional payment, known as variation margin, if the loss causes the equity in the account to fall below an established maintenance level. Each Fund will maintain cash or liquid securities sufficient to cover its obligations under each futures contract that it has entered into.

To liquidate a futures position before the contract expiration date, a buyer simply sells the contract, and the seller of the contract simply buys the contract, on the futures exchange. However, the entire value of the contract does not change hands; only the gains and losses on the contract since the preceding day are credited and debited to the accounts of the buyers and sellers, just as on every other preceding trading day, and the positions are closed out.

One risk in employing Futures to attempt to protect against declines in the value of the securities held by a Fund is the possibility that the prices of Futures will correlate imperfectly with the behavior of the market value of that Fund’s securities. The ordinary spreads between prices in the cash and futures markets, due to differences in those markets, are subject to distortions. First, all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through off-setting transactions which could distort the normal relationship between the cash and futures markets. Second, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortion. The liquidity of the Futures being considered for purchase or sale by a Fund will be a factor in their selection by the Adviser. Third, from the point of view of speculators the deposit requirements in the futures market are less onerous than margin requirements in the securities

market. Therefore, increased participation by speculators in the futures market may cause temporary price distortions.

It is possible that, where a Fund has sold Futures in a short hedge, the market may advance but the value of the securities held by the Fund may decline. If this occurred, that Fund would lose money on the Future and also experience a decline in the value of its securities. Where Futures are purchased in a long hedge, it is possible that the market may decline; if the Fund then decides not to invest in securities at that time because of concern as to possible further market decline or for other reasons, that Fund will realize a loss on the Future that is not offset by a reduction in the price of any securities purchased.

Options on Debt Futures

Options on Futures are similar to options on securities, except that the related investment is not a security, but a Future. Thus, the buyer of a call option obtains the right to purchase a Future at a specified price during the life of the option, and the buyer of a put option obtains the right to sell a Future at a specified price during the life of the option. The options are traded on an expiration cycle based on the expiration cycle of the underlying Future.

The risks of options on Futures are similar to those of options on securities and also include the risks inherent in the underlying Futures.

Exclusion from Definition of Commodity Pool Operator

The Commodity Futures Trading Commission (“CFTC”) has eliminated limitations on futures transactions and options thereon by registered investment companies, provided that the manager to the registered investment company claims an exclusion from regulation as a commodity pool operator. The Trust has claimed an exclusion from the definition of the term “commodity pool operator” under the Commodity Exchange Act and therefore is not subject to registration or regulation as a pool operator under the Commodity Exchange Act. As a result of these CFTC rule changes, the Funds are no longer restricted in their ability to enter into futures transactions and options thereon under CFTC regulations. The Funds, however, continue to have policies with respect to futures and options thereon as set forth above. The current view of the staff of the SEC is that a Fund’s long and short positions in future contracts as well as put and call options on futures written by it must be collateralized with cash or other liquid securities and segregated with the Funds’ custodian or a designated sub-custodian or “covered” in a manner similar to that for covered options on securities and designed to eliminate any potential leveraging.

Special Risks of Hedging Strategies

Participation in the options or futures markets involves investment risks and transactions costs to which each Fund would not be subject absent the use of these strategies. In particular, the loss from investing in futures contracts is potentially unlimited. If the Adviser’s prediction of movements in the securities and interest rate markets is inaccurate, a Fund could be in a worse position than if such strategies were not used. Risks inherent in the use of options, futures contracts and options on futures contracts include: (1) dependence on the Adviser’s ability to predict correctly movements in the direction of interest rates, securities prices and currency markets; (2) imperfect correlation between the price of options and futures contracts and options thereon and movements in the prices of the securities being hedged; (3) the fact that skills needed to use these strategies are different from those needed to select portfolio securities; and (4) the possible absence of a liquid secondary market for any particular instrument at any time.

Limitations on Options and Futures

Transactions in options by the Funds will be subject to limitations established by each of the exchanges governing the maximum number of options which may be written or held by a single investor or group of investors acting in concert, regardless of whether the options are written or held on the same or different exchanges or are written or held in one or more accounts or through one or more brokers. Thus, the number of options which a Fund may write or hold may be affected by options written or held by other investment advisory clients of the Adviser and its affiliates. Position limits also apply to Futures. An exchange may order the liquidations of positions found to be in excess of these limits, and it may impose certain sanctions.

Swaps

Credit Default Swaps. Each Fund may enter into credit default swap agreements. The credit default swap agreement may have as a reference obligation one or more securities that are not currently held by the Funds. The buyer in a credit default swap agreement is obligated to pay the seller a periodic fee, typically expressed in basis points on the principal amount of the underlying obligation (the “notional” amount), over the term of the agreement in return for a contingent payment upon the occurrence of a credit event with respect to the underlying reference obligation. A credit event is typically a default, restructuring or bankruptcy.

Each Fund may be either the buyer or seller in the transaction. As a seller, a Fund receives a fixed rate of income throughout the term of the agreement, which typically is between one month and five years, provided that no credit event occurs. If a credit event occurs, a Fund typically must pay the contingent payment to the buyer, which is typically the par value (full notional value) of the reference obligation. The contingent payment may be a cash settlement or by physical delivery of the reference obligation in return for payment of the face amount of the obligation. If a Fund is a buyer and no credit event occurs, the Fund may lose its investment and recover nothing. However, if a credit event occurs, the buyer typically receives full notional value for a reference obligation that may have little or no value.

Credit default swaps may involve greater risks than if a Fund had invested in the reference obligation directly. Credit default swaps are subject to general market risk, liquidity risk and credit risk. If a Fund is a buyer in a credit default swap agreement and no credit event occurs, then it will lose its investment. In addition, the value of the reference obligation received by a Fund as a seller if a credit event occurs, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund.

Each Fund may also invest in credit default swap index products and in options on credit default swap index products. These instruments are designed to track representative segments of the credit default swap market and provide investors with exposure to specific “baskets” of issuers of bonds or loans. Such investments are subject to liquidity risks as well as other risks associated with investments in credit default swaps discussed above. Each Fund reserves the right to invest in similar instruments that may become available in the future.

Each Fund may also use credit default swap indices. The individual credits underlying these credit default swap indices may be rated above BBB, below BBB or non-rated.

Temporary Investments

Each Fund may invest in cash and money market securities. A Fund may do so to have assets available to pay expenses, satisfy redemption requests or take advantage of investment opportunities. Money market securities include treasury bills, short-term investment-grade fixed income securities, bankers' acceptances, money market funds, commercial paper, commercial paper master notes and repurchase agreements.

Each Fund may invest in commercial paper or commercial paper master notes rated, at the time of purchase, within the two highest rating categories by a nationally recognized securities rating organization ("NRSRO").

Each Fund may enter into repurchase agreements. A repurchase agreement transaction occurs when, at the time a Fund purchases a security, that Fund agrees to resell it to the vendor (normally a commercial bank or a broker-dealer) on an agreed upon date in the future. Such securities are referred to as the "Resold Securities." The Adviser will consider the creditworthiness of any vendor of repurchase agreements. The resale price will be in excess of the purchase price in that it reflects an agreed upon market interest rate effective for the period of time during which a Fund's money is invested in the Resold Securities. The majority of these transactions run from day to day, and the delivery pursuant to the resale typically will occur within one to five days of the purchase. The Funds' risk is limited to the ability of the vendor to pay the agreed-upon sum upon the delivery date; in the event of bankruptcy or other default by the vendor, there may be possible delays and expenses in liquidating the instrument purchased, decline in its value and loss of interest. These risks are minimized when a Fund holds a perfected security interest in the Resold Securities and can therefore resell the instrument promptly. Repurchase agreements can be considered as loans "collateralized" by the Resold Securities, such agreements being defined as "loans" in the Investment Company Act of 1940, as amended (the "1940 Act"). The return on such "collateral" may be more or less than that from the repurchase agreement. The Resold Securities will be marked to market every business day so that the value of the "collateral" is at least equal to the value of the loan, including the accrued interest earned thereon. All Resold Securities will be held by the Funds' custodian or another bank either directly or through a securities depository.

Each Fund may invest in shares of other investment companies. Each Fund may invest in money market mutual funds in connection with its management of daily cash positions. Each Fund currently intends to limit its investments in securities issued by other investment companies (except for money market funds) so that not more than 3% of the outstanding voting stock of any one investment company will be owned by a Fund, or its affiliated persons, as a whole. In addition to the advisory and operational fees a Fund bears directly in connection with its own operation, a Fund would also bear its pro rata portions of each other investment company's advisory and operational expenses.

U.S. Government Securities and Mortgage-Backed Securities

The residential mortgage market in the United States recently has experienced difficulties that may adversely affect the performance and market value of certain of a Fund's mortgage-related investments. Delinquencies and losses on residential mortgage loans (especially subprime and second-lien mortgage loans) generally have increased recently and may continue to increase, and a decline in or flattening of housing values (as has recently been experienced and may continue to be experienced in many housing markets) may exacerbate such delinquencies and losses. Borrowers with adjustable rate mortgage loans are more sensitive to changes in interest rates, which affect their monthly mortgage payments, and may be unable to secure replacement mortgages at comparably low interest rates. Also, a number of residential mortgage loan originators have recently experienced serious financial difficulties or bankruptcy. Owing

largely to the foregoing, reduced investor demand for mortgage loans and mortgage-related securities, and increased investor yield requirements have caused limited liquidity in the secondary market for mortgage-related securities, which can adversely affect the market value of mortgage-related securities. It is possible that such limited liquidity in such secondary markets could continue or worsen.

As used in this SAI, the term “U.S. Government securities” means securities issued or guaranteed by the U.S. Government or any of its agencies or instrumentalities.

Securities issued or guaranteed by the U.S. Government include a variety of Treasury securities (*i.e.*, securities issued by the U.S. Government) that differ only in their interest rates, maturities and dates of issuance. Treasury Bills have maturities of one year or less. Treasury Notes have maturities of one to ten years, and Treasury Bonds generally have maturities of greater than ten years at the date of issuance. Zero coupon Treasury securities consist of Treasury Notes and Bonds that have been stripped of their unmatured interest coupons.

U.S. Government agencies or instrumentalities which issue or guarantee securities include, but are not limited to, the Federal Housing Administration, Federal National Mortgage Association, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, Government National Mortgage Association, General Services Administration, Central Bank for Cooperatives, Federal Home Loan Banks, Federal Home Loan Mortgage Corporation, Federal Intermediate Credit Banks, Federal Land Banks, Maritime Administration, Tennessee Valley Authority, District of Columbia Armory Board, the Inter-American Development Bank, the Asian Development Bank, the Student Loan Marketing Association and the International Bank for Reconstruction and Development.

Except for U.S. Treasury securities, obligations of U.S. Government agencies and instrumentalities may or may not be supported by the full faith and credit of the United States. Some are backed by the right of the issuer to borrow from the Treasury; others by discretionary authority of the U.S. Government to purchase the agencies’ obligations; while still others, such as the Student Loan Marketing Association, are supported only by the credit of the instrumentality. In the case of securities not backed by the full faith and credit of the United States, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, and may not be able to assert a claim against the United States itself in the event the agency or instrumentality does not meet its commitment. A Fund investing in U.S. Government securities will invest in securities of such instrumentality only when the Adviser is satisfied that the credit risk with respect to any instrumentality is acceptable.

Among the U.S. Government securities that a Fund investing in U.S. Government securities may purchase are “mortgage-backed securities” of the Government National Mortgage Association (“Ginnie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac”) and the Federal National Mortgage Association (“Fannie Mae”). These mortgage-backed securities include “pass-through” securities and “participation certificates;” both are similar, representing pools of mortgages that are assembled, with interests sold in the pool; the assembly is made by an “issuer” which assembles the mortgages in the pool and passes through payments of principal and interest for a fee payable to it. Payments of principal and interest by individual mortgagors are “passed through” to the holders of the interest in the pool. Thus, the monthly or other regular payments on pass-through securities and participation certificates include payments of principal (including prepayments on mortgages in the pool) rather than only interest payments. Another type of mortgage-backed security is the “collateralized mortgage obligation” or “CMO,” which is similar to a conventional bond (in that it makes fixed interest payments and has an established maturity date) and is secured by groups of individual mortgages. Timely payment of principal and interest on Ginnie Mae pass-throughs is guaranteed by the full faith and credit of the United States, but their yield is not guaranteed. Freddie Mac and Fannie Mae are both instrumentalities of the U.S.

Government, but their obligations are not backed by the full faith and credit of the United States. It is possible that the availability and the marketability (*i.e.*, liquidity) of these securities discussed in this paragraph could be adversely affected by actions of the U.S. Government to tighten the availability of its credit or to affect adversely the tax effects of owning them.

As of September 7, 2008, the Federal Housing Finance Agency (“FHFA”) has been appointed to be the Conservator of Freddie Mac and Fannie Mae for an indefinite period. In accordance with the Federal Housing Finance Regulatory Reform Act of 2008 and the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, as Conservator, the FHFA will control and oversee the entities until the FHFA deems them financially sound and solvent. During the Conservatorship, each entity’s obligations are expected to be paid in the normal course of business. Although no express guarantee exists for the debt or mortgage-backed securities issued by the entities, the U.S. Department of Treasury, through a secured lending credit facility and a Senior Preferred Stock Purchase Agreement, has attempted to enhance the ability of the entities to meet their obligations.

The investment characteristics of adjustable and fixed rate mortgage-backed securities differ from those of traditional fixed income securities. The major differences include the payment of interest and principal on mortgage-backed securities on a more frequent (usually monthly) schedule, and the possibility that principal may be prepaid at any time due to prepayments on the underlying mortgage loans or other assets. These differences can result in significantly greater price and yield volatility than is the case with traditional fixed income securities. As a result, if a Fund purchases mortgage-backed securities at a premium, a faster than expected prepayment rate will reduce both the market value and the yield to maturity from those which were anticipated. A prepayment rate that is slower than expected will have the opposite effect of increasing yield to maturity and market value. Conversely, if a Fund purchases mortgage-backed securities at a discount, faster than expected prepayments will increase, while slower than expected prepayments will reduce, yield to maturity and market value.

Prepayments on a pool of mortgage loans are influenced by a variety of factors, including economic conditions, changes in mortgagors’ housing needs, job transfer, unemployment, mortgagors’ net equity in the mortgage properties and servicing decisions. The timing and level of prepayments cannot be predicted. Generally, however, prepayments on adjustable rate mortgage loans and fixed rate mortgage loans will increase during a period of falling mortgage interest rates and decrease during a period of rising mortgage interest rates. Accordingly, the amounts of prepayments available for reinvestment by a Fund are likely to be greater during a period of declining mortgage interest rates. If general interest rates also decline, such prepayments are likely to be reinvested at lower interest rates than a Fund was earning on the mortgage-backed securities that were prepaid.

Certain mortgage loans underlying the mortgage-backed securities in which a Fund may invest will be adjustable rate mortgage loans (“ARMs”). ARMs eligible for inclusion in a mortgage pool will generally provide for a fixed initial mortgage interest rate for a specified period of time. Thereafter, the interest rates (the “Mortgage Interest Rates”) may be subject to periodic adjustment based on changes in the applicable index rate (the “Index Rate”). The adjusted rate would be equal to the Index Rate plus a gross margin, which is a fixed percentage spread over the Index Rate established for each ARM at the time of its origination.

There are two main categories of indexes which provide the basis for rate adjustments on ARMs: those based on U.S. Treasury securities and those derived from a calculated measure such as a cost of funds index or a moving average of mortgage rates. Commonly utilized indexes include the one-year, three-year and five-year constant maturity Treasury rates, the three-month Treasury Bill rate, the 180-day Treasury Bill rate, rates on longer-term Treasury securities, the 11th District Federal Home Loan Bank

Cost of Funds, the National Median Cost of Funds, the one-month, three-month, six-month or one year London Interbank Offered Rate (LIBOR), the prime rate of a specific bank, or commercial paper rates. Some indexes, such as the one-year constant maturity Treasury rate, closely mirror changes in market interest rate levels. Others, such as the 11th District Federal Home Loan Bank Cost of Funds index, tend to lag behind changes in market rate levels and tend to be somewhat less volatile. The degree of volatility in the market value of a Fund's portfolio and therefore in the NAV per share of the Fund will be a function of the length of the interest rate reset periods and the degree of volatility in the applicable indexes.

Adjustable interest rates can cause payment increases that some mortgagors may find difficult to make. However, certain ARMs may provide that the Mortgage Interest Rate may not be adjusted to a rate above an applicable lifetime maximum rate or below an applicable lifetime minimum rate for such ARMs. Certain ARMs may also be subject to limitations on the maximum amount by which the Mortgage Interest Rate may adjust for any single adjustment period (the Maximum Adjustment). Other ARMs ("Negatively Amortizing ARMs") may provide instead or as well for limitations on changes in the monthly payment on such ARMs. Limitations on monthly payments can result in monthly payments which are greater or less than the amount necessary to amortize a Negatively Amortizing ARM by its maturity at the Mortgage Interest Rate in effect in any particular month. In the event that a monthly payment is not sufficient to pay the interest accruing on a Negatively Amortizing ARM, any such excess interest is added to the principal balance of the loan, causing negative amortization, and is repaid through future monthly payments. It may take borrowers under Negatively Amortizing ARMs longer periods of time to achieve equity and may increase the likelihood of default by such borrowers. In the event that a monthly payment exceeds the sum of the interest accrued at the applicable Mortgage Interest Rate and the principal payment which would have been necessary to amortize the outstanding principal balance over the remaining term of the loan, the excess (or accelerated amortization) further reduces the principal balance of the ARM. Negatively Amortizing ARMs do not provide for the extension of their original maturity to accommodate changes in their Mortgage Interest Rate. As a result, unless there is a periodic recalculation of the payment amount (which there generally is), the final payment may be substantially larger than the other payments. These limitations on periodic increases in interest rates and on changes in monthly payments protect borrowers from unlimited interest rate and payment increases.

The mortgage loans underlying other mortgage-backed securities in which each Fund may invest will be fixed rate mortgage loans. Generally, fixed rate mortgage loans eligible for inclusion in a mortgage pool will bear simple interest at fixed annual rates and have original terms to maturity ranging from 5 to 40 years. Fixed rate mortgage loans generally provide for monthly payments of principal and interest in substantially equal installments for the contractual term of the mortgage note in sufficient amounts to fully amortize principal by maturity although certain fixed rate mortgage loans provide for a large final "balloon" payment upon maturity.

CMOs are issued in multiple classes. Each class of CMOs, often referred to as a "tranche," is issued at a specific adjustable or fixed interest rate and must be fully retired no later than its final distribution date. Principal prepayments on the mortgage loans or other assets ("Mortgage Assets") underlying the CMOs may cause some or all of the class of CMOs to be retired substantially earlier than their final distribution dates. Generally interest is paid or accrued on all classes of CMOs on a monthly basis.

The principal of and interest on the Mortgage Assets may be allocated among the several classes of CMOs in various ways. In certain structures (known as "sequential pay" CMOs), payments of principal, including any principal prepayments, on the Mortgage Assets generally are applied to the classes of CMOs in the order of their respective final distribution dates. Thus no payment of principal will be made

on any class of sequential pay CMOs until all other classes having an earlier final distribution date have been paid in full.

Additional structures of CMOs include, among others, “parallel pay” CMOs. Parallel pay CMOs are those which are structured to apply principal payments and prepayments of the Mortgage Assets to two or more classes concurrently on a proportionate or disproportionate basis. These simultaneous payments are taken into account in calculating the final distribution date of each class.

Each Fund may invest in stripped mortgage-backed U.S. Government securities (“SMBS”). SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions from a pool of Mortgage Assets. A common type of SMBS will have one class receiving all of the interest from the Mortgage Assets, while the other class will receive all of the principal. However, in some instances, one class will receive some of the interest and most of the principal while the other class will receive most of the interest and the remainder of the principal. If the underlying Mortgage Assets experience greater than anticipated prepayments of principal, a Fund may fail to fully recover its initial investment in these securities. Certain SMBS may not be readily marketable and will be considered illiquid for purposes of a Fund’s limitation on holdings in illiquid securities. Whether SMBS are liquid or illiquid will be determined in accordance with guidelines established by the Board. The market value of the class consisting entirely of principal payments generally is unusually volatile in response to changes in interest rates. The yield on a class of SMBS that receives all or most of the interest from Mortgage Assets are generally higher than prevailing market yields on other mortgage-backed securities because their cash flow patterns are more volatile and there is a greater risk that the initial investment will not be fully recouped.

Mortgage loans are subject to a variety of state and federal regulations designed to protect mortgagors, which may impair the ability of the mortgage lender to enforce its rights under the mortgage documents. These regulations include legal restraints on foreclosures, homeowner rights of redemption after foreclosure, federal and state bankruptcy and debtor relief laws, restrictions on enforcement of mortgage loan “due on sale” clauses and state usury laws. Even though each Fund will invest in mortgage-backed securities which are U.S. Government securities, these regulations may adversely affect a Fund’s investments by delaying the Fund’s receipt of payments derived from principal or interest on mortgage loans affected by such regulations.

Structured Notes

Each Fund may invest in structured notes and indexed securities whose value depends upon, or is derived from the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes.

Structured notes are derivative debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities include structured notes as well as securities other than debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities may include a multiplier that multiplies the indexed element by a specified factor and, therefore, the value of such securities may be very volatile. Structured or indexed securities may be more volatile, less liquid, and more difficult to accurately price than less complex securities or more traditional debt securities. To the extent the Funds invest in these securities, however, the Adviser analyzes these securities in its overall assessment of the effective duration of a Fund’s portfolio in an effort to monitor each Fund’s interest rate risk.

Payment-in-Kind Securities

Each Fund may also purchase Payment-in-Kind (“PIK”) securities. PIK securities are financial instruments that pay investors in the form of additional securities rather than cash coupons. Like zero-coupon bonds, they give a company breathing room before having to make cash outlays, offering in return rich yields. PIKs can be bonds, notes, or preferred stocks with interest or dividends paid in securities rather than cash. The securities used to pay the interest or dividends are usually identical to the underlying securities, but occasionally they have different terms.

Trust Preferred Securities

Each Fund may purchase trust preferred securities, also known as “trust preferreds” or “hybrid preferreds,” which are preferred stocks issued by a special purpose trust subsidiary backed by subordinated debt of the corporate parent. An issuer creates trust preferred securities by creating a trust and issuing debt to the trust. The trust in turn issues trust preferred securities. Trust preferred securities are hybrid securities with characteristics of both subordinated debt and preferred stock. Such characteristics include long maturities (typically 30 years or more), early redemption by the issuer, periodic fixed or variable interest payments, and maturities at face value. In addition, trust preferred securities may allow deferral of interest payments for up to five years. However, during the deferral period the interest accrues and is taxable for the holder. Holders of trust preferred securities have limited voting rights to control the activities of the trust and no voting rights with respect to the parent company.

When Issued and Delayed-Delivery Securities

To ensure the availability of suitable securities for its portfolio, each Fund may purchase when-issued or delayed delivery securities. When-issued transactions arise when securities are purchased by a Fund with payment and delivery taking place in the future in order to secure what is considered to be an advantageous price and yield to the Fund at the time of entering into the transaction. When-issued securities represent securities that have been authorized but not yet issued. Each Fund may also purchase securities on a forward commitment or delayed delivery basis. In a forward commitment transaction, a Fund contracts to purchase securities for a fixed price at a future date beyond customary settlement time. A Fund is required to hold and maintain until the settlement date, cash or other liquid assets in an amount sufficient to meet the purchase price. Alternatively, a Fund may enter into offsetting contracts for the forward sale of other securities that it owns. The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines prior to the settlement date. Although a Fund would generally purchase securities on a when-issued or forward commitment basis with the intention of actually acquiring securities for its portfolio, it may dispose of a when-issued security or forward commitment prior to settlement if the Adviser deems it appropriate to do so.

Each Fund may enter into mortgage “dollar rolls” in which a Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type, coupon and maturity) securities on a specified future date. During the roll period, a Fund forgoes principal and interest paid on the mortgage-backed securities. A Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the “drop”) as well as by the interest earned on the cash proceeds of the initial sale. A “covered roll” is a specific type of dollar roll for which there is an offsetting cash position or a cash equivalent security position which matures on or before the forward settlement date of the dollar roll transaction. The Funds will only enter into covered rolls. Covered rolls are not treated as a borrowing or other senior security.

Limited Partnerships

Each Fund can hold limited partnership interests that it acquires from a preexisting bond participation in a reorganization. A limited partnership is a business model in which at least one general partner and at least one limited partner share a business' ownership. In a limited partnership, the general partner does not usually invest any capital, but has management authority and unlimited liability. That is, the general partner runs the business and, in the event of a bankruptcy, is responsible for all debts not paid or discharged. The limited partners have no management authority and confine their participation to their capital investment. Limited partners invest a certain amount of money and have nothing else to do with the business. The liability of limited partners is limited to the amount of the investment. In the worst case scenario for a limited partner, he or she loses what he or she invested. Profits are divided between general and limited partners according to an arrangement formed at the creation of the partnership.

Mortgage-Related and Other Asset-Backed Securities

Mortgage-related securities include mortgage pass-through securities, collateralized mortgage obligations ("CMOs"), commercial mortgage-backed securities, mortgage dollar rolls, CMO residuals, stripped mortgage-backed securities ("SMBSs") and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property.

The value of some mortgage- or asset-backed securities may be particularly sensitive to changes in prevailing interest rates. Early repayment of principal on some mortgage-related securities may expose a Fund to a lower rate of return upon reinvestment of principal. When interest rates rise, the value of a mortgage-related security generally will decline; however, when interest rates are declining, the value of mortgage-related securities with prepayment features may not increase as much as other fixed income securities. The rate of prepayments on underlying mortgages will affect the price and volatility of a mortgage-related security, and may shorten or extend the effective maturity of the security beyond what was anticipated at the time of purchase. If unanticipated rates of prepayment on underlying mortgages increase the effective maturity of a mortgage-related security, the volatility of the security can be expected to increase. The value of these securities may fluctuate in response to the market's perception of the creditworthiness of the issuers. Additionally, although mortgages and mortgage-related securities are generally supported by some form of government or private guarantee and/or insurance, there is no assurance that private guarantors or insurers will meet their obligations.

One type of SMBS has one class receiving all of the interest from the mortgage assets (the interest-only, or "IO" class), while the other class will receive all of the principal (the principal-only, or "PO" class). The yield to maturity on an IO class is extremely sensitive to the rate of principal payments (including prepayments) on the underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on a Fund's yield to maturity from these securities. Each Fund may invest up to 5% of its total assets in any combination of mortgage-related or other asset-backed IO, PO, or inverse floater securities.

Each Fund may invest in collateralized debt obligations ("CDOs"), which includes collateralized bond obligations ("CBOs"), collateralized loan obligations ("CLOs") and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high-risk, below investment grade fixed-income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. Each Fund may invest in other asset-backed securities that have been offered to investors.

The effects of the sub-prime mortgage crisis that began to unfold in 2007 continue to manifest in nearly all the sub-divisions of the financial services industry. Sub-prime mortgage related losses and write downs among investment banks and similar institutions reached significant levels in 2008. The impact of these losses among traditional banks, investment banks, broker/dealers and insurers has forced a number of large such institutions into either liquidation or combinations, while drastically increasing the volatility of their stock prices. In some cases, the U.S. government has acted to bail out select institutions, such as insurers, however the risks associated with investment in stocks of such issuers has nonetheless increased substantially.

Congress has recently passed legislation to provide the U.S. Department of the Treasury with the authority to issue up to \$700 billion of Treasury securities to finance the purchase of troubled assets from financial institutions. There can be no assurance that this legislation will cause the risks associated with investment in the stock market in general or in financial services company stocks to decrease.

Municipal Bonds

Municipal bonds are generally issued by states and local governments and their agencies, authorities and other instrumentalities. Municipal bonds are subject to interest rate, credit and market risk. The ability of an issuer to make payments could be affected by litigation, legislation or other political events or the bankruptcy of the issuer. Lower-rated municipal bonds are subject to greater credit and market risk than higher quality municipal bonds. The types of municipal bonds in which a Fund may invest include municipal lease obligations. Each Fund may also invest in industrial development bonds, which are municipal bonds issued by a government agency on behalf of a private sector company and, in most cases, are not backed by the credit of the issuing municipality and may therefore involve more risk. Each Fund may also invest in securities issued by entities whose underlying assets are municipal bonds.

Each Fund may invest, without limitation, in residual interest bonds (“RIBs”), which brokers create by depositing municipal bonds in trusts. The trusts in turn issue variable rate securities and RIBs. The interest rate for the variable rate security is determined by an index or an auction process held approximately every 7 to 35 days, while the RIB holder receives the balance of the income from the underlying municipal bond less an auction fee. The market prices of RIBs may be highly sensitive to changes in market rates and may decrease significantly when market rates increase.

In a transaction in which a Fund purchases a RIB from a trust, and the underlying municipal bond was held by the Fund prior to being deposited into the trust, the Fund treats the transaction as a secured borrowing for financial reporting purposes. As a result, the Fund will incur a non-cash interest expense with respect to interest paid by the trust on the variable rate securities, and will recognize additional interest income in an amount directly corresponding to the non-cash interest expense. Therefore, the Fund’s net asset value per share and performance are not affected by the non-cash interest expense. This accounting treatment does not apply to RIBs acquired by the Fund where the Fund did not previously own the underlying municipal bond.

Event-Linked Exposure

Each Fund may obtain event-linked exposure by investing in “event-linked bonds” or “event-linked swaps” or implement “event-linked strategies.” Event-linked exposure results in gains or losses that typically are contingent, or formulaically related to, defined trigger events. Examples of trigger events include hurricanes, earthquakes, weather-related phenomena, or statistics relating to such events. Some event-linked bonds are commonly referred to as “catastrophe bonds.” If a trigger event occurs, a Fund

may lose a portion or its entire principal invested in the bond or notional amount on a swap. Event-linked exposure often provides for an extension of maturity to process and audit loss claims where a trigger event has, or possibly has, occurred. An extension of maturity may increase volatility. Event-linked exposure may also expose a Fund to certain unanticipated risks including credit risk, counterparty risk, adverse regulatory or jurisdictional interpretations, and adverse tax consequences. Event-linked exposures may also be subject to liquidity risk.

Preferred Stocks

Each Fund may invest in preferred stocks. A preferred stock blends the characteristics of a bond and common stock. It can offer the fixed dividends of a bond and the equity ownership of a common stock. Unlike common stock, its participation in the issuer's growth may be limited. Preferred stock has priority claim over common stock: (a) in the receipt of dividends, and (b) should the issuer be dissolved, in any residual assets after payment to creditors. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

Convertible Securities

Each Fund may also invest in convertible securities. Convertible securities are bonds or preferred stocks that may be converted (exchanged) into common stock of the issuing company within a certain period of time, for a specified number of shares.

Foreign Securities

Each Fund may also invest in foreign securities. There are risks in investing in foreign securities. Foreign economies may differ from the U.S. economy; individual foreign companies may differ from domestic companies in the same industry; foreign currencies may be stronger or weaker than the U.S. dollar.

An investment may be affected by changes in currency rates and in exchange control regulations, and a Fund may incur transaction costs in exchanging currencies. For example, at times when the assets of a Fund are invested in securities denominated in foreign currencies, investors can expect that the value of such investments will tend to increase when the value of the U.S. dollar is decreasing against such currencies. Conversely, a tendency toward a decline in the value of such investments can be expected when the value of the U.S. dollar is increasing against such currencies.

Non-U.S. companies are frequently not subject to accounting and financial reporting standards applicable to domestic companies, and there may be less information available about foreign issuers. Foreign securities are generally less liquid and more volatile than those of comparable domestic issuers. There is frequently less government regulation of broker-dealers and issuers than in the United States. The costs associated with securities transactions are generally higher than in the United States. In addition, investments in foreign countries are subject to the possibility of expropriation, confiscatory taxation, political or social instability or diplomatic developments that could adversely affect the value of those investments.

Most foreign securities owned by a Fund are held by foreign subcustodians that satisfy certain eligibility requirements. However, foreign subcustodian arrangements are significantly more expensive than domestic custody. In addition, foreign settlement of securities transactions is subject to local law and custom that is not, generally, as well established or as reliable as U.S. regulation and custom applicable to

settlements of securities transactions and, accordingly, there is generally perceived to be a greater risk of loss in connection with securities transactions in many foreign countries.

Each Fund may invest in securities of companies in countries with emerging economies or securities markets (“Emerging Markets”). Investment in Emerging Markets involves risks in addition to those generally associated with investments in foreign securities. Political and economic structures in many Emerging Markets may be undergoing significant evolution and rapid development, and such countries may lack the social, political and economic stability characteristics of more developed countries. As a result, the risks described above relating to investments in foreign securities, including the risks of nationalization or expropriation of assets, may be heightened. In addition, unanticipated political or social developments may affect the values of the investments of a Fund and the availability to the Fund of additional investments in such Emerging Markets. The small size and inexperience of the securities markets in certain Emerging Markets and the limited volume of trading in securities in those markets may make the Funds’ investments in such countries less liquid and more volatile than investments in countries with more developed securities markets (such as the U.S., Japan and most Western European countries).

To manage the currency risk accompanying investments in foreign securities and to facilitate the purchase and sale of foreign securities, the Funds may engage in foreign currency transactions on a spot (cash) basis at the spot rate prevailing in the foreign currency exchange market or through entering into contracts to purchase or sell foreign currencies at a future date (“forward foreign currency” contracts or “forward” contracts).

A forward foreign currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large commercial banks) and their customers. A forward contract generally has no deposit requirement and no commissions are charged at any stage for trades.

When a Fund enters into a contract for the purchase or sale of a security denominated in a foreign currency, it may desire to “lock in” the U.S. dollar price of the security (transaction hedging). By entering into a forward contract for the purchase or sale of a fixed amount of U.S. dollars equal to the amount of foreign currency involved in the underlying security transaction, the Fund can protect itself against a possible loss, resulting from an adverse change in the relationship between the U.S. dollar and the subject foreign currency during the period between the date the security is purchased or sold and the date on which the payment is made or received.

When the Adviser believes that a particular foreign currency may suffer a substantial decline against the U.S. dollar, it may enter into a forward contract to sell a fixed amount of the foreign currency approximating the value of some or all of the portfolio securities of the Funds denominated in such foreign currency (position hedging). The precise matching of the forward contract amounts and the value of the securities involved will not generally be possible since the future value of such securities in foreign currencies will change as a consequence of market movements in the value of those securities between the date the forward contract is entered into and the date it matures. The projection of short-term currency market movement is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. A Fund will not enter into such forward contracts or maintain a net exposure to such contracts where the consummation of the contracts would obligate the Fund to deliver an amount of foreign currency in excess of the value of the Fund’s securities or other assets denominated in that currency. Under normal circumstances, the Adviser considers the long-term prospects for a particular currency and incorporates the prospect into its overall long-term diversification strategies. The Adviser

believes that it is important to have the flexibility to enter into such forward contracts when it determines that the best interests of a Fund will be served.

At the maturity of a forward contract, a Fund may either sell the portfolio securities and make delivery of the foreign currency, or it may retain the securities and terminate its contractual obligation to deliver the foreign currency by purchasing an “offsetting” contract obligating it to purchase, on the same maturity date, the same amount of foreign currency.

If a Fund retains the portfolio securities and engages in an offsetting transaction, the Fund will incur a gain or a loss to the extent that there has been movement in forward contract prices. If the Fund engages in an offsetting transaction, it may subsequently enter into a forward contract to sell the foreign currency. Should forward prices decline during the period when the Fund entered into the forward contract for the sale of a foreign currency and the date it entered into an offsetting contract for the purchase of the foreign currency, the Fund will realize a gain to the extent the price of the currency it has agreed to sell exceeds the price of the currency it has agreed to purchase. Should forward prices increase, the Fund will suffer a loss to the extent that the price of the currency it has agreed to purchase exceeds the price of the currency it has agreed to sell.

Shareholders should note that: (1) foreign currency hedge transactions do not protect against or eliminate fluctuations in the prices of particular portfolio securities (*i.e.*, if the price of such securities declines due to an issuer’s deteriorating credit situation); and (2) it is impossible to forecast with precision the market value of securities at the expiration of a forward contract. Accordingly, a Fund may have to purchase additional foreign currency on the spot market (and bear the expense of such purchase) if the market value of the Fund’s securities is less than the amount of the foreign currency upon expiration of the contract. Conversely, a Fund may have to sell some of its foreign currency received upon the sale of a portfolio security if the market value of the Fund’s securities exceeds the amount of foreign currency the Fund is obligated to deliver. Each Fund’s dealings in forward foreign currency exchange contracts will be limited to the transactions described above.

Although each Fund values its assets daily in terms of U.S. dollars, it does not intend to convert its holdings of foreign currencies into U.S. dollars on a daily basis. A Fund will do so from time to time and investors should be aware of the costs of currency conversion. Although foreign exchange dealers do not charge a fee for conversion, they realize a profit based on the difference (the “spread”) between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire to resell that currency to the dealer.

Each Fund may own a bond denominated in U.S. dollars and purchase a currency futures contract to increase its exposure to different foreign currencies. It may also sell a currency futures contract on the U.S. dollar to increase its exposure to various foreign currencies. The uses and risks of currency options and futures are similar to options and futures relating to securities or indexes, as discussed above. Currency futures contracts are similar to forward foreign currency contracts, except that they are traded on exchanges (and have margin requirements) and are standardized as to contract size and delivery date. Most currency futures contracts call for payment or delivery in U.S. dollars. The underlying instrument of a currency option may be a foreign currency, which generally is purchased or delivered in exchange for U.S. dollars, or may be a futures contract. The purchaser of a currency call obtains the right to purchase the underlying currency and the purchaser of a currency put obtains the right to sell the underlying currency.

Currency futures and options values can be expected to correlate with exchange rates, but may not reflect other factors that affect the value of a Fund's investments. A currency hedge, for example, should protect a Yen-dominated security from a decline in the Yen, but will not protect a Fund against a price decline resulting from deterioration in the issuer's creditworthiness. Because the value of a Fund's foreign-denominated investments change in response to many factors other than exchange rates, it may not be possible to match the amount of currency options and futures to the value for a Fund's investments exactly over time.

Portfolio Turnover

Each Fund's portfolio turnover may vary significantly from year to year. A Fund's annual portfolio turnover rate may exceed 100%. High portfolio turnover (100% or more) would result in a Fund incurring more transaction costs such as mark-ups or mark-downs. Payment of these transaction costs could reduce a Fund's total return. High portfolio turnover could also result in the payment by a Fund's shareholders of increased taxes on realized gains.

Investment Restrictions

The Trust has adopted the following restrictions applicable to the Funds as fundamental policies, which may not be changed without the approval of the holders of a "majority," as defined in the 1940 Act, of the shares of the Funds as to which the policy change is being sought. Under the 1940 Act, approval of the holders of a "majority" of a Fund's outstanding voting securities means the affirmative vote of the holders of the lesser of (i) 67% of its shares represented at a meeting at which more than 50% of its outstanding shares are represented or (ii) more than 50% of its outstanding shares.

Each Fund with respect to 75% of its total assets may not purchase any security, other than U.S. Government securities, if as a result (a) more than 5% of such Fund's total assets (taken at current value) would then be invested in securities of a single issuer or (b) it would hold more than 10% of the outstanding voting securities of any one issuer.

Each Fund may not:

1. Make loans to others, except (a) through the purchase of debt securities in accordance with its investment objectives and policies, (b) to the extent the entry into a repurchase agreement is deemed to be a loan.
2. Borrow (for temporary or emergency purposes and not for the purpose of leveraging its investments) in an amount exceeding 33 1/3% of the value of its total assets, and, in the event that market conditions or other factors result in the Fund's borrowed amounts exceeding 33 1/3% of its total assets (including amounts borrowed), the Fund will reduce the amount of its borrowing to an extent and in such a manner required by the 1940 Act.
3. Purchase or sell physical commodities, unless acquired as a result of ownership of securities or other instruments and provided that this restriction does not prevent the Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by physical commodities.
4. Invest 25% or more of the value of its net assets in the securities of companies engaged in any one industry (other than securities issued or guaranteed by the U.S. Government or any of its agencies or instrumentalities or securities of other investment companies).

5. Issue senior securities, such as shares having priority over other shares as to the payment of dividends, or as defined in the 1940 Act, except that this restriction shall not be deemed to prohibit the Fund from (a) making any permitted borrowings, mortgages or pledges, or (b) entering into options, futures, currency contracts or repurchase transactions.
6. Purchase or sell real estate; however, the Fund may invest in debt securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein, including real estate investment trusts.
7. Act as an underwriter except to the extent the Fund may be deemed to be an underwriter when disposing of securities it owns or when selling its own shares.

Each Fund observes the following policies, which are deemed non-fundamental and which may be changed without shareholder vote. Each Fund may not:

1. Hold, in the aggregate, more than 15% of its net assets in securities that are illiquid. Illiquid securities are securities that cannot be sold or disposed of in the ordinary course of business within seven business days at approximately the value at which they are being carried on a Fund's books.
2. Purchase more than 3% of any other investment company's voting securities or make any other investment in other investment companies except as permitted by the 1940 Act.
3. Make any change in its investment policy of investing at least 80% of its net assets in the investments suggested by the Fund's name without first providing the Fund's shareholders with at least 60 days' prior notice.

Except with respect to borrowing and illiquid securities, if a percentage restriction described in the Prospectus or in this SAI is adhered to at the time of investment, a subsequent increase or decrease in a percentage resulting from a change in the values of assets will not constitute a violation of that restriction.

MANAGEMENT

The overall management of the business and affairs of the Trust is vested with its Board. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Adviser, Administrator, Custodian and Transfer Agent (each as defined below). The day-to-day operations of the Trust are delegated to its officers, subject to the Funds' investment objectives, strategies, and policies and to general supervision by the Board.

The Trustees and officers of the Trust, their ages, positions with the Trust, term of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held are listed in the table below. Unless noted otherwise, each person has held the position listed for a minimum of five years.

Independent Trustees⁽¹⁾

Name, Address and Age	Position Held with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex Overseen by Trustee ⁽²⁾	Other Directorships Held During Past Five Years
Sallie P. Diederich (age 60) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since January 2011.	Independent Mutual Fund Consultant, (1995 to present); Advisor Corporate Controller, Transamerica Fund Management Company (1994 to 1995); Senior Vice President, Mutual Fund and Custody Operations, Putnam Investments (1992 to 1993); Vice President and Controller, Mutual Fund Accounting, American Capital Mutual Funds (1986 to 1992).	6	None.
Donald E. O'Connor (age 74) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since February 1997.	Retired; former Financial Consultant and former Executive Vice President and Chief Operating Officer of ICI Mutual Insurance Company (until January 1997).	6	Trustee, The Forward Funds (35 portfolios).
George J. Rebhan (age 76) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since May 2002.	Retired; formerly President, Hotchkis and Wiley Funds (mutual funds) (1985 to 1993).	6	Independent Trustee from 1999 to 2009, E*TRADE Funds.
George T. Wofford (age 70) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since February 1997.	Retired; formerly Senior Vice President, Federal Home Loan Bank of San Francisco.	6	None.

Interested Trustee

Name, Address and Age	Position Held with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex Overseen by Trustee⁽²⁾	Other Directorships Held During Past Five Years
Joe D. Redwine ⁽³⁾ (age 63) 615 E. Michigan Street Milwaukee, WI 53202	Interested Trustee	Indefinite term since September 2008.	President, CEO, U.S. Bancorp Fund Services, LLC (May 1991 to present).	6	None.

Officers

Name, Address and Age	Position Held with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years
Joe D. Redwine (age 63) 615 E. Michigan Street Milwaukee, WI 53202	Chairman and Chief Executive Officer	Indefinite term since September 2007.	President, CEO, U.S. Bancorp Fund Services, LLC (May 1991 to present).
Douglas G. Hess (age 43) 615 E. Michigan Street Milwaukee, WI 53202	President and Principal Executive Officer	Indefinite term since June 2003.	Vice President, Compliance and Administration, U.S. Bancorp Fund Services, LLC (March 1997 to present).
Cheryl L. King (age 49) 615 E. Michigan Street Milwaukee, WI 53202	Treasurer and Principal Financial Officer	Indefinite term since December 2007.	Assistant Vice President, Compliance and Administration, U.S. Bancorp Fund Services, LLC (October 1998 to present).
Michael L. Ceccato (age 52) 615 E. Michigan Street Milwaukee, WI 53202	Vice President, Chief Compliance Officer and AML Officer	Indefinite term since September 2009.	Vice President, U.S. Bancorp Fund Services, LLC (February 2008 to present); General Counsel/Controller, Steinhafels, Inc. (September 1995 to February 2008).
Jeanine M. Bajczyk, Esq. (age 45) 615 E. Michigan Street Milwaukee, WI 53202	Secretary	Indefinite term since June 2007.	Senior Vice President and Counsel, U.S. Bancorp Fund Services, LLC (May 2006 to present); Senior Counsel, Wells Fargo Funds Management, LLC (May 2005 to May 2006); Senior Counsel, Strong Financial Corporation (January 2002 to April 2005).

(1) The Trustees of the Trust who are not “interested persons” of the Trust as defined under the 1940 Act (“Independent Trustees”).

(2) The Trust is comprised of numerous portfolios managed by unaffiliated investment advisers. The term “Fund Complex” applies only to the Funds and PIA BBB Bond Fund, PIA MBS Bond Fund, PIA Moderate Duration Bond Fund and PIA Short-Term Securities Fund and not to any other series of the Trust. The Funds do not

hold themselves out as related to any other series within the Trust for investment purposes, nor do they share the same investment adviser with any other series, except as noted above.

- (3) Mr. Redwine is an “interested person” of the Trust as defined by the 1940 Act. Mr. Redwine is an interested Trustee of the Trust by virtue of the fact that he is an interested person of Quasar Distributors, LLC who acts as principal underwriter to the series of the Trust.

Compensation

Set forth below is the anticipated compensation to be received by the Independent Trustees from each Fund for the fiscal year ending November 30, 2010. The Independent Trustees receive an annual trustee fee of \$50,000 per year from the Trust with no additional fee for special meetings. The Trustees also receive reimbursement from the Trust for expenses incurred in connection with attendance at regular meetings. The amounts are allocated among each of the current series of the Trust. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

Name of Independent Trustee	Estimated Aggregate Compensation from the High Yield Fund ⁽¹⁾	Estimated Aggregate Compensation from the High Yield (MACS) Fund ⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Annual Benefits Upon Retirement	Estimated Total Compensation from Fund Complex Paid to Trustees ⁽²⁾
Sallie P. Diederich ⁽³⁾	\$1,284	\$940	None	None	\$9,303
Donald E. O’Connor	\$1,284	\$940	None	None	\$9,303
George J. Rebhan	\$1,284	\$940	None	None	\$9,303
George T. Wofford	\$1,284	\$940	None	None	\$9,303
Name of Interested Trustee					
Joe D. Redwine	None	None	None	None	None

⁽¹⁾ For the Funds’ fiscal year ending November 30, 2010.

⁽²⁾ There are currently numerous series comprising the Trust. The term “Fund Complex” refers only to the Funds and PIA BBB Bond Fund, PIA MBS Bond Fund, PIA Moderate Duration Bond Fund and PIA Short-Term Securities Fund and not to any other series of the Trust. For the Funds’ fiscal year ending November 30, 2011, Independent Trustees’ fees for the Trust are estimated in the amount of \$200,000.

⁽³⁾ Effective January 1, 2011, Ms. Diederich was appointed as an Independent Trustee.

Additional Information Concerning Our Board of Trustees

The Role of the Board

The Board provides oversight of the management and operations of the Trust. Like all mutual funds, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust, such as the Trust’s Advisers, Distributor, Administrator, Custodian, and Transfer Agent, each of whom are discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the Advisers, Distributor, Administrator, Custodian and Transfer Agent. The Board has appointed various senior individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust’s day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust’s operations. The Board has appointed a Chief Compliance Officer who administers the Trust’s compliance program

and regularly reports to the Board as to compliance matters. Some of these reports are provided as part of formal “Board Meetings” which are typically held quarterly, in person, and involve the Board’s review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal “Board Meetings,” to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust and its oversight role does not make the Board a guarantor of the Trust’s investments, operations or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. It has established four standing committees, an Audit Committee, a Nominating Committee, a Qualified Legal Compliance Committee (the “QLCC”) and a Valuation Committee, which are discussed in greater detail under “Board Committees,” below. More than seventy-five percent (75%) of the members of the Board are Independent Trustees, which are Trustees that are not affiliated with the Adviser or its affiliates or any other investment adviser in the Trust, and each of the Audit Committee, Nominating Committee and QLCC are comprised entirely of Independent Trustees. The Independent Trustees have engaged their own independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Chairman of the Board is the Chief Executive Officer of the Trust and a Trustee; he is an “interested person” of the Trust, as defined by the 1940 Act, by virtue of the fact that he is an interested person of Quasar Distributors, LLC, the Trust’s Distributor and principal underwriter. He is also the President and CEO of the Administrator to the Trust. The President and Principal Executive Officer of the Trust is not a Trustee, but rather is a senior employee of the Administrator who routinely interacts with the unaffiliated investment advisers of the Trust and comprehensively manages the operational aspects of the Funds in the Trust. The Trust has appointed George J. Rebhan as lead Independent Trustee.

The Board reviews its structure annually. The Trust has determined that it is appropriate to separate the Principal Executive Officer and Board Chairman positions because the day-to day responsibilities of the Principal Executive Officer are not consistent with the oversight role of the Trustees and because of the potential conflict of interest that may arise from the Administrator’s duties with the Trust. The Board has also determined that the appointment of a lead Independent Trustee, the function and composition of the Audit Committee, the Nominating Committee, and the QLCC are appropriate means to address any potential conflicts of interest that may arise from the Chairman’s status as an Interested Trustee. Given the specific characteristics and circumstances of the Trust as described above, the Trust has determined that the Board’s leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel. Because risk management is a broad concept comprised of many elements (such as, for example, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.) the oversight of different types of risks is handled in different ways. For example, the Audit Committee meets regularly with the Chief Compliance Officer to discuss compliance and operational risks. The Audit Committee also meets with the Treasurer and the Trust’s independent public accounting firm to discuss, among other things, the internal control structure of the Trust’s financial reporting function. The full Board receives reports from the Adviser and portfolio managers as to investment risks as well as other risks that may be also discussed in Audit Committee.

Information about Each Trustee’s Qualification, Experience, Attributes or Skills

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills (“Trustee Attributes”) appropriate to their continued service as Trustees of the Trust in light of the Trust’s business and structure. Each of the Trustees has substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and access information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the majority of the Trustees have served on boards for organizations other than the Trust, as well as having served on the Board of the Trust for a number of years. They therefore have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a ‘self-assessment’ wherein the effectiveness of the Board and individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each particular Trustee and certain of their Trustee Attributes. The information provided below, and in the table above, is not all-inclusive. Many Trustee Attributes involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests. In conducting its annual self-assessment, the Board has determined that the Trustees have the appropriate attributes and experience to continue to serve effectively as Trustees of the Trust.

Sallie P. Diederich. Ms. Diederich is experienced with financial, accounting, investment and regulatory matters through her position as an independent mutual fund management consultant. Prior to establishing her own consulting business, Ms. Diederich gained substantial experience in mutual fund operations and accounting through senior positions at large mutual fund complexes. Ms. Diederich is a Certified Public Accountant and serves as the Trust’s Audit Committee Financial Expert.

Donald E. O’Connor. Mr. O’Connor has served on a number of mutual fund boards and is experienced with financial, accounting, investment and regulatory matters through his prior service as a trustee of The Forward Funds, Inc. and his prior position as Chief of the Branch of Market Surveillance at the U.S. Securities and Exchange Commission. Mr. O’Connor also has substantial experience in mutual fund operations through senior positions at industry trade associations, including Vice President of Operations for the Investment Company Institute covering accounting, transfer agent and custodian industry functions and Chief Operating Officer of ICI Mutual, a captive insurance company focused exclusively on the insurance needs of mutual funds, their directors, officers, and advisers.

George J. Rebhan. Mr. Rebhan has served on a number of mutual fund boards and is experienced with financial, accounting, investment and regulatory matters through his prior service as a trustee of E*Trade Funds and as President of the Hotchkis and Wiley mutual fund family. Mr. Rebhan also has substantial investment experience through his former association with a registered investment adviser.

Joe D. Redwine. Mr. Redwine has substantial mutual fund experience and is experienced with financial, accounting, investment and regulatory matters through his position as President and CEO of U.S. Bancorp Fund Services, LLC, a full service provider to mutual funds and alternative investment products. In addition, he has extensive experience consulting with investment advisers regarding the legal structure of mutual funds, distribution channel analysis and actual distribution of those funds.

George T. Wofford. Mr. Wofford is experienced in financial, accounting, regulatory and investment matters through his executive experience as a Senior Vice President of Federal Home Loan Bank of San Francisco (“FHLB-SF”) where he was involved with the development of FHLB-SF’s information technology infrastructure as well as legal and regulatory financial reporting.

Board Committees

The Trust has established the following four standing committees and the membership of each committee to assist in its oversight functions, including its oversight of the risks the Trust faces: the Audit Committee, the QLCC, the Nominating Committee and the Valuation Committee. There is no assurance, however, that the Board's committee structure will prevent or mitigate risks in actual practice. The Trust's committee structure is specifically not intended or designed to prevent or mitigate each Fund's investment risks. Each Fund is designed for investors that are prepared to accept investment risk, including the possibility that as yet unforeseen risks may emerge in the future.

The Audit Committee is comprised of all of the Independent Trustees. It does not include any interested Trustees. Mr. Rebhan is the Audit Committee Chairman. The Audit Committee meets regularly with respect to the various series of the Trust. The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the audit and any matters bearing on the audit or a Fund's financial statements and to ensure the integrity of the Fund's pricing and financial reporting.

The Audit Committee also serves as the QLCC for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations, regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer (the "issuer attorneys"). An issuer attorney who becomes aware of evidence of a material violation by the Trust, or by any officer, director, employee, or agent of the Trust, may report evidence of such material violation to the QLCC as an alternative to the reporting requirements of Rule 205.3(b) (which requires reporting to the chief legal officer and potentially "up the ladder" to other entities). The QLCC meets as needed.

The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for Trustees as is considered necessary from time to time and meets only as necessary. The Nominating Committee is comprised of Messrs. O'Connor, Rebhan and Wofford.

The Nominating Committee will consider nominees recommended by shareholders for vacancies on the Board. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed Nominee, and such recommendation must comply with the notice provisions set forth in the Trust's Amended and Restated By-Laws. In general, to comply with such procedures, such nominations, together with all required biographical information, must be delivered to and received by the President of the Trust at the principal executive office of the Trust between 120 and 150 days prior to the shareholder meeting at which any such nominee would be voted on.

The Board has delegated day-to-day valuation issues to a Valuation Committee that is comprised of one or more Trustees and representatives from the Administrator's staff. The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee and the actions of the Valuation Committee are subsequently reviewed and ratified by the Board of Trustees. The Valuation Committee meets as needed.

Trustee Ownership of Fund Shares and Other Interests

No Trustee owned shares of the Funds as of the calendar year ended December 31, 2010.

As of December 31, 2010, neither the Independent Trustees nor members of their immediate families, own securities beneficially or of record in the Adviser, the Distributor, as defined below, or an affiliate of the Adviser or Distributor. Accordingly, neither the Independent Trustees nor members of their immediate families, have direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Distributor or any of their affiliates. In addition, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate families have conducted any transactions (or series of transactions) in which the amount involved exceeds \$120,000 and to which the Adviser, the Distributor or any affiliate thereof was a party.

Control Persons, Principal Shareholders, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of a Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of the Funds.

As of January 31, 2011, the following shareholders were considered to be either a control person or principal shareholder of the High Yield Fund, Investor Class:

Name and Address	Parent Company	Jurisdiction	% Ownership	Type of Ownership Record
Pershing LLC P.O. Box 2052 Jersey City, NJ 07303-2052	Pershing Group LLC	DE	43.81%	Record
Lloyd McAdams Family Trust 1200 Turquesa Lane Pacific Palisades, CA 90272-2248	N/A	N/A	39.57%	Record
National Financial FBO FIICO as Agent 100 Magellan Way KW1C Covington, KY 41015-1987	N/A	N/A	16.62%	Record

Since the High Yield Fund, Advisor Class and the High Yield (MACS) Fund was not operational prior to the date of this SAI, there were no principal shareholders or control persons of the High Yield Fund, Advisor Class and the High Yield (MACS) Fund and the Trustees and officers of the Trust as a group did not own more than 1% of either Fund's outstanding shares.

Investment Adviser

Pacific Income Advisers, Inc. is the investment adviser to the Funds. Joseph Lloyd McAdams, Jr. and Heather U. Baines collectively control the Adviser due to their ownership of a majority of the outstanding stock of the Adviser. Subject to such policies as the Board may determine, the Adviser is ultimately responsible for investment decisions for the Funds. Pursuant to the terms of the Advisory Agreement, the Adviser provides each Fund with such investment advice and supervision as it deems necessary for the proper supervision of each Fund's investments.

After the initial two-year term, the Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the

relevant Fund's outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on such Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Funds on 60 days' written notice when authorized either by a majority vote of each Fund's shareholders or by a vote of a majority of the Board, or by the Adviser on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Funds, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

Under the Advisory Agreement applicable to each Fund, the Adviser is paid a fee computed daily and payable monthly, at an annual rate expressed as a percentage of the applicable Fund's average daily net assets. The applicable fee rates are as follows:

<u>Fund</u>	<u>Fee Rate</u>
PIA High Yield Fund	0.65%
PIA High Yield (MACS) Fund	0.00%

The Adviser has contractually agreed to waive a portion or all of its management fee (excluding acquired fund fees and expenses, interest, taxes and other expenses) and/or pay PIA High Yield Fund expenses through at least March 30, 2012, to the extent necessary to permit the PIA High Yield Fund to maintain the expense limitations set forth below. In addition, the Adviser has voluntarily agreed to pay Fund expenses (excluding acquired fund fees and expenses) for the PIA High Yield (MACS) Fund for an indefinite period through at least March 30, 2012, to the extent necessary to permit the PIA High Yield (MACS) Fund to maintain a voluntary expense limitation of 0.00%. The Adviser may discontinue payment of PIA High Yield (MACS) Fund expenses after March 30, 2012, as long as it provides shareholders of the PIA High Yield (MACS) Fund with written notice six months in advance. The Adviser may not recoup expense payments in future periods. Expense payment obligations are calculated daily and paid monthly, at an annual rate expressed as a percentage of each Fund's average daily net assets. The applicable contractual and voluntary expense limitations are as follows:

<u>Fund</u>	<u>Expense Limitation</u>
PIA High Yield Fund – Investor Class	0.98%
PIA High Yield Fund – Advisor Class	1.23%
PIA High Yield (MACS) Fund – Managed Account Completion Shares	0.00%

In addition to the fees payable to the Adviser, each Fund is responsible for its own operating expenses, including: fees and expenses incurred in connection with the issuance, registration and transfer of its shares; brokerage and commission expenses; all expenses of transfer, receipt, safekeeping, servicing and accounting for the cash, securities and other property of the Trust for the benefit of each Fund including all fees and expenses of its custodian and accounting services agent; fund administration fees and related expenses; chief compliance officer fees; interest charges on any borrowings; costs and expenses of pricing and calculating its daily NAV per share and of maintaining its books of account required under the 1940 Act, including pricing services; taxes, if any; a pro rata portion of expenditures in connection with meetings of each Fund's shareholders and the Board that are properly payable by a Fund; compensation and fees and expenses of members of the Board who are not members of, affiliated with or interested persons of the Adviser or Administrator; insurance premiums on property or personnel of each Fund which inure to its benefit, including liability and fidelity bond insurance; the cost of preparing and

printing reports, proxy statements, prospectuses and the statement of additional information of the Fund or other communications for distribution to existing shareholders; legal counsel, auditing and accounting fees; trade association membership dues (including membership dues in the Investment Company Institute allocable to the Fund); fees and expenses (including legal fees) of registering and maintaining registration of their shares for sale under federal and applicable state and foreign securities laws; all expenses of maintaining shareholder accounts, including all charges for transfer, shareholder recordkeeping, dividend disbursing, redemption, and other agents for the benefit of the Fund, if any; and all other charges and costs of its operation plus any extraordinary and non-recurring expenses. General expenses of the Trust are allocated among all of the series of the Trust, including the Fund in a manner proportionate to the net assets of the Fund, on a transactional basis, or on such other basis as the Board deems equitable.

Portfolio Managers

Mr. Robert E. Sydow, Mr. Kevin S. Buckle, CFA, Mr. James Lisko and Mr. Timothy Tarpenting serve as the portfolio managers for the Funds. The portfolio managers are responsible for the day-to-day management of each Fund's portfolio. The following table shows the number of other accounts managed by the portfolio managers and the total assets in the accounts managed within various categories as of April 30, 2010.

Robert E. Sydow

Type of Accounts	Number of Accounts	Total Assets (\$mm)	With Management Fee Based on Performance	
			Number of Accounts	Total Assets (\$mm)
Registered Investment Companies	0	\$0.00	0	\$0.00
Other Pooled Investments	1	\$287 million	1	\$287 million
Other Accounts	1	\$10.65 million	0	\$0.00

Kevin S. Buckle, CFA

Type of Accounts	Number of Accounts	Total Assets (\$mm)	With Management Fee Based on Performance	
			Number of Accounts	Total Assets (\$mm)
Registered Investment Companies	0	\$0.00	0	\$0.00
Other Pooled Investments	1	\$287 million	1	\$287 million
Other Accounts	1	\$10.65 million	0	\$0.00

James Lisko

Type of Accounts	Number of Accounts	Total Assets (\$mm)	With Management Fee Based on Performance	
			Number of Accounts	Total Assets (\$mm)

Other Pooled Investments	1	\$287 million	1	\$287 million
Other Accounts	1	\$10.65 million	0	\$0.00

Timothy Tarpending

Type of Accounts	Number of Accounts	Total Assets (\$mm)	With Management Fee Based on Performance	
			Number of Accounts	Total Assets (\$mm)
Registered Investment Companies	0	\$0.00	0	\$0.00
Other Pooled Investments	0	\$0.00	0	\$0.00
Other Accounts	0	\$0.00	0	\$0.00

Material Conflict of Interest. No material strategy conflicts currently exist. When the same securities being bought or sold on the same day by the portfolio managers, the portfolio managers allocate the transactions on a pro rata basis as long as it is in the best interests of the clients. Where conflicts of interest arise between the Funds and other accounts managed by the portfolio managers, the portfolio managers will proceed in a manner that the Funds will not be treated materially less favorably. There may be instances where similar portfolio transactions may be executed for the same security for numerous accounts managed by each portfolio management team. In such instances, securities will be allocated in accordance with the Adviser’s trade allocation policy.

Compensation. The portfolio managers’ total compensation includes a base salary, bonus, performance bonus, employee benefits and 401(k) plan with matching contributions. The general year-end bonus represents a subjective calculation of an individual’s contribution to the portfolio management group’s success. However, Messrs. Sydow, Buckle and Lisko’s bonus is also derived from a contractual share of revenue for all high yield assets managed by the Adviser, including the assets in the Funds.

Securities Owned in the Funds by Portfolio Managers. As of the date of this SAI, the portfolio managers did not beneficially own any shares of the High Yield Fund, Advisor Class or the High Yield (MACS) Fund as they had not commenced operations. The portfolio managers beneficially owned the following amounts of the High Yield Fund, Investor Class as of February 25, 2011:

Name of Portfolio Manager	Dollar Range of Equity Securities Beneficially Owned in the Fund
	(None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, \$100,001 - \$500,000, \$500,001 to \$1,000,000, Over \$1,000,000)
Robert Sydow	None
Kevin Buckle	\$10,001 - \$50,000
James Lisko	\$10,001 - \$50,000
Timothy Tarpending	\$100,001 - \$500,000

SERVICE PROVIDERS

Administrator

Pursuant to an Administration Agreement (the “Administration Agreement”), U.S. Bancorp Fund Services, LLC (the “Administrator” or “USBFS”), 615 East Michigan Street, Milwaukee, Wisconsin 53202, acts as administrator for the Funds. The Administrator provides certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds’ independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Funds with applicable laws and regulations excluding those of the securities laws of

various states; arranging for the computation of performance data, including NAV per share and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Funds, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, the Administrator does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Funds' shares. Pursuant to the Administration Agreement, as compensation for its services, USBFS receives from the Funds, a fee based on the combined current average daily net assets of the Funds managed by the Adviser: 0.035% on the first \$250 million, 0.03% on the next \$750 million, 0.025 on the next \$1 billion and 0.02% on the remaining assets, with a minimum annual fee of \$30,000 for each Fund. Additionally, the Administrator provides Chief Compliance Officer services to the Trust under a separate agreement. The cost for the Chief Compliance Officer services is allocated to each Fund by the Board.

The Administration Agreement is terminable without penalty by the Trust on behalf of the Funds or by the Administrator on 60 days' written notice (as defined in the 1940 Act). The Administration Agreement also provides that neither the Administrator nor its personnel shall be liable for any error of judgment or mistake of law or for any act or omission in the administration of the Funds, except for willful misconduct, bad faith or negligence in the performance of its or their duties under the Administration Agreement.

Distributor

The Trust has entered into a Distribution Agreement (the "Distribution Agreement") with Quasar Distributors, LLC, an affiliate of the Administrator, 615 East Michigan Street, Milwaukee, Wisconsin 53202 (the "Distributor"), pursuant to which the Distributor acts as the Fund's distributor, provides certain administration services and promotes and arranges for the sale of each Fund's shares. The offering of each Fund's shares is continuous.

After the initial two-year term, the Distribution Agreement will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of each Fund's outstanding voting securities and, in either case, by a majority of the Trustees who are not parties to the Distribution Agreement or "interested persons" (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of each Fund on 60 days' written notice when authorized either by a majority vote of each Fund's shareholders or by vote of a majority of the Board, including a majority of the Trustees who are not "interested persons" (as defined in the 1940 Act) of the Trust, or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Board of Trustees approved the Distribution Agreement on June 3, 2010.

Fund Accountant and Transfer Agent

USBFS also serves as fund accountant, transfer agent ("Transfer Agent") and dividend disbursing agent under separate agreements.

Custodian

U.S. Bank National Association, located at 1555 N. River Center Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as custodian ("Custodian") of the securities and other assets of each Fund. The Custodian holds each Fund's portfolio securities in safekeeping and keeps all necessary records and documents relating to its duties. The Custodian is compensated with an asset-based fee plus transaction

fees and is reimbursed for out-of-pocket expenses. The Custodian and Transfer Agent do not participate in decisions relating to the purchase and sale of securities by each Fund. The Custodian, Distributor, Transfer Agent and Administrator are all affiliated entities under the common control of U.S. Bancorp. The Custodian and its affiliates may participate in revenue sharing arrangements with service providers of mutual funds in which a Fund may invest.

Independent Registered Public Accounting Firm

Tait, Weller & Baker LLP (“Tait”), 1818 Market Street, Suite 2400, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Funds whose services include auditing the Funds’ financial statements and the performance of related tax services.

Trust Counsel

Paul, Hastings, Janofsky & Walker LLP (“Paul Hastings”), 75 E. 55th Street, New York, New York 10022, is counsel to the Trust and provides counsel on legal matters relating to the Funds. Paul Hastings also serves as independent legal counsel to the Board of Trustees.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by each Fund and which broker-dealers are eligible to execute a Fund’s portfolio transactions. The purchases and sales of securities in the over-the-counter market will generally be executed directly with a “market-maker” unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for each Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which a Fund will be holding, unless better executions are available elsewhere. Dealers and underwriters usually act as principal for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below. Explicit brokerage commissions are not paid on these transactions. However, commissions will be paid on a Fund’s futures and options transactions. The purchase price of portfolio securities purchased from an underwriter or dealer may include underwriting commissions and dealer spreads.

In placing portfolio transactions, the Adviser seeks best execution. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm’s risk in positioning a block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research, as it is defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, and statistical information to the Adviser that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by them under their Advisory Agreement with each Fund, to be useful in varying degrees, but of indeterminable value. Portfolio

transactions may be placed with broker-dealers who sell shares of a Fund subject to procedures adopted by the Trust and rules adopted by the Financial Industry Regulatory Authority, Inc. (“FINRA”) and SEC.

While it is the Adviser’s general policy to seek best execution in selecting a broker-dealer to execute portfolio transactions for each Fund, when it is determined that one or more broker-dealer can deliver best execution, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to each Fund or to the Adviser, even if the specific services are not directly useful to a Fund and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, a Fund may therefore pay a higher commission or spread than would be the case if no weight was given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser’s overall responsibilities to each Fund. Additionally, the Adviser may direct transactions to a broker-dealer with which it has an affiliation.

Investment decisions for each Fund are made independently from those of other client accounts that may be managed or advised by the Adviser. Nevertheless, it is possible that at times identical securities will be acceptable for a Fund and one or more of such client accounts. In such event, the position of a Fund and such client accounts in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seeks to acquire the same security as a Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, a Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that each Fund is purchasing or selling, each day’s transactions in such security will be allocated between a Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as each Fund is concerned. In other cases, however, it is believed that the ability of each Fund to participate in volume transactions may produce better executions for a Fund.

The Funds do not effect securities transactions through brokers in accordance with any formula, nor do they effect securities transactions through brokers for selling shares of the Funds. However, as stated above, broker-dealers who execute brokerage transactions may effect purchases of shares of the Funds for their customers.

The research services discussed above may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic or institutional ideas and information assisting the Funds in the valuation of their investments.

The Trust is required to identify any securities of its “regular brokers or dealers” that the Funds have acquired during its most recent fiscal year.

PORTFOLIO HOLDINGS INFORMATION

The Adviser and the Funds maintain portfolio holdings disclosure policies (the “Disclosure Policies”) that govern the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by the Funds. These Disclosure Policies have been approved by the Board. Disclosure of each Fund’s complete holdings is required to be made quarterly within 60 days

of the end of each fiscal quarter in the Annual Report and Semi-Annual Report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov. A complete listing of each Fund's portfolio holdings is available at the end of each month with a lag time of five to ten business days on the Funds' website at www.piamutualfunds.com.

Pursuant to the Funds' Disclosure Policies, information about the Funds' portfolio holdings is not distributed to any person unless:

- The disclosure is required pursuant to a regulatory request, court order or is legally required in the context of other legal proceedings;
- The disclosure is made to a mutual fund rating and/or ranking organization, or person performing similar functions, who is subject to a duty of confidentiality, including a duty not to trade on any non-public information;
- The disclosure is made to internal parties involved in the investment process, administration, operation or custody of the Funds, including, but not limited to USBFS and the Board, attorneys, auditors or accountants;
- The disclosure is made: (a) in connection with a quarterly, semi-annual or annual report that is available to the public; or (b) relates to information that is otherwise available to the public; or
- The disclosure is made with the prior written approval of either the Trust's CCO or his or her designee.

Certain of the persons listed above receive information about each Fund's portfolio holdings on an ongoing basis. The Funds believe that these third parties have legitimate objectives in requesting such portfolio holdings information and operate in the best interest of the Funds' shareholders. These persons include:

- A mutual fund rating and/or ranking organization, or person performing similar functions, who is subject to a duty of confidentiality, including a duty not to trade on any non-public information;
- Rating and/or ranking organizations, specifically: Lipper; Morningstar; S&P; Bloomberg; Vickers-Stock Research Corporation; Thomson Financial; and Capital Bridge, all of which currently receive such information between the fifth and tenth business day of the month following the end of a calendar quarter; and
- Internal parties involved in the investment process, administration, operation or custody of the Funds, specifically: USBFS; the Board; and the Trust's attorneys and accountants (currently, Paul Hastings and Tait), all of which typically receive such information after it is generated.

Any disclosures to additional parties not described above are made with the approval of either the Trust's CCO or his or her designee, pursuant to the Funds' Policies.

The Board exercises continuing oversight of the disclosure of the Funds' portfolio holdings by (1) overseeing the implementation and enforcement of the Disclosure Policies, Codes of Ethics and other relevant policies of the Funds and their service providers by the Trust's CCO, (2) considering reports and recommendations by the Trust's CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) considering to approve any amendment to these Disclosure Policies. The Board reserves the right to amend the Disclosure Policies at any time without prior notice in their sole discretion.

Neither the Adviser nor the Funds may receive compensation in connection with the disclosure of information about the portfolio securities. In the event of a conflict between the interests of the Funds and the interests of the Adviser or an affiliated person of the Adviser, the CCO of the Adviser, in consultation with the Trust's CCO, shall make a determination in the best interests of the Funds, and shall report such determination to the Adviser's Board of Directors and to the Board at the end of the quarter in which such determination was made. Any employee of the Adviser who suspects a breach of this obligation must report the matter immediately to the Adviser's CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without lag as part of the normal investment activities of the Funds to each of the following entities which, by explicit agreement or by virtue of their respective duties to the Funds, are required to maintain the confidentiality of the information disclosed: Fund Administrator, Fund Accountant, Custodian, Transfer Agent, auditors, counsel to the Funds or the trustees, broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities), and regulatory authorities. Portfolio holdings information not publicly available with the SEC or through the Funds' website may only be provided to additional third parties, in accordance with the Disclosure Policies, when the Funds have a legitimate business purpose and the third party recipient is subject to a confidentiality agreement.

In no event shall the Adviser, its affiliates or employees, or the Funds receive any direct or indirect compensation in connection with the disclosure of information about the Funds' portfolio holdings.

There can be no assurance that the Disclosure Policies and these procedures will protect the Funds from potential misuse of that information by individuals or entities to which it is disclosed.

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures (the "Proxy Policies") on behalf of the Trust which delegate the responsibility for voting proxies to the Adviser, subject to the Board's continuing oversight. The Proxy Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Funds and their shareholders. The Proxy Policies also require the Adviser to present to the Board, at least annually, the Adviser's Proxy Policies and a record of each proxy voted by the Adviser on behalf of the Funds, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest. A copy of the Adviser's Proxy Voting Policy can be found in Appendix B.

Conflict of Interest. Where a proxy proposal raises a material conflict between the Adviser's interests and the Funds' interests, the Adviser will disclose the conflict to the Board and may resolve the conflict by voting in accordance with the Adviser's Proxy Policies or the Adviser will abstain from voting the securities held by the Funds, depending on the circumstances.

Proxy Voting Records. The Trust is required to annually file Form N-PX, which lists each Fund's complete proxy voting record for the 12-month period ending June 30. Each Fund's proxy voting record is available without charge, upon request by calling 1-800-251-1970 and on the SEC's website at www.sec.gov.

DISTRIBUTION AND SERVICE PLAN

The PIA High Yield Fund has adopted a Distribution and Service Plan in accordance with Rule 12b-1 under the 1940 Act (the "Rule 12b-1 Plan") for the Advisor Class Shares. The Rule 12b-1 Plan provides

that the High Yield Fund, Advisor Class Shares will compensate the Distributor or other intermediary at an annual rate of up to 0.25% of the average daily net assets of the High Yield Fund, Advisor Class Shares which may be paid for a distribution fee and for certain shareholder services to shareholders of the High Yield Fund, Advisor Class Shares. The Board has determined that there is a reasonable likelihood that the Rule 12b-1 Plan will benefit the High Yield Fund, Advisor Class Shares and its shareholders. None of the Officers or Trustees of the Trust has any direct or indirect financial interest in the Rule 12b-1 Plan.

The Rule 12b-1 Plan, unless terminated as hereinafter provided, shall continue in effect from year to year only so long as such continuance is specifically approved at least annually by the Board of Trustees and its Independent Trustees cast in person at a meeting called for the purpose of voting on such continuance. The Rule 12b-1 Plan may be terminated with respect to the High Yield Fund, Advisor Class Shares at any time by a vote of a majority of the Independent Trustees or by the vote of the holders of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the High Yield Fund, Advisor Class Shares. The Rule 12b-1 Plan may not be amended to increase materially the amount of payments to be made without shareholder approval, as set forth in (ii) above, and all amendments must be and have been approved in the manner set forth under (i) above.

DETERMINATION OF NET ASSET VALUE

Each Fund’s NAV per share will be determined as of the close of regular trading (4:00 P.M. Eastern Time) on each day the New York Stock Exchange (“NYSE”) is open for trading. The NYSE is open for trading Monday through Friday except New Year’s Day, Dr. Martin Luther King, Jr. Day, Washington’s Birthday/Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Additionally, if any of the aforementioned holidays falls on a Saturday, the NYSE will not be open for trading on the preceding Friday and when any such holiday falls on a Sunday, the NYSE will not be open for trading on the succeeding Monday, unless unusual business conditions exist, such as the ending of a monthly or the yearly accounting period. Each Fund reserves the right to close if the primary trading markets of a Fund’s portfolio instruments are closed and a Fund’s management believes that there is not an adequate market to meet purchase, redemption or exchange requests. On any business day when the Securities Industry and Financial Markets Association recommends that the securities markets close trading early, a Fund may close trading early.

Purchase orders for Fund shares will be accepted only on days on which a Fund is open for business. If a purchase order is received by the Distributor on a day when a Fund is not open for business, it will be processed on the next succeeding day the Fund is open for business (according to the succeeding day’s NAV).

The NAV per share is computed by dividing the value of the securities held by a Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of interests in a Fund outstanding at such time, as shown below:

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV per share}$$

In determining a Fund’s NAV per share, common stocks that are listed on national securities exchanges are valued at the last sale price as of the close of trading, or in the absence of recorded sales, at the average of readily available closing bid and asked prices on such exchanges. NASDAQ Global Market securities are valued at the NASDAQ Official Closing Price (“NOCP”). If an NOCP is not issued for a given day, these securities are valued at the average of readily available closing bid and asked prices.

Unlisted securities held by a Fund that are not included in the NASDAQ Stock Market are valued at the average of the quoted bid and asked prices in the over-the-counter market. Securities and other assets for which market quotations are not readily available are valued by appraisal at their fair value as determined in good faith by the Adviser under procedures established by and under the general supervision and responsibility of the Board of Trustees. Short-term investments which mature in less than 60 days are valued at amortized cost (unless the Board determines that this method does not represent fair value), if their original maturity was 60 days or less, or by amortizing the value as of the 61st day prior to maturity, if their original term to maturity exceeded 60 days. An option that is written by a Fund or purchased by a Fund is generally valued using composite pricing. Composite pricing uses the National Best Bid and Offer quotes (“NBBO”). NBBO consists of the highest bid price and lowest ask price across any of the options exchanges on which an option is quoted. Specifically, composite pricing looks at the last trades on the exchanges where the options are traded. If there are no trades for the option on a given business day, as of closing, composite option pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded.

When a Fund writes a call or a put, an amount equal to the premium received is included in the Statement of Assets and Liabilities as an asset, and an equivalent amount is included in the liability section. This amount is “marked-to-market” to reflect the current market value of the call or put. If a call a Fund wrote is exercised, the proceeds it receives on the sale of the related investment by it are increased by the amount of the premium it received. If a put a Fund wrote is exercised, the amount it pays to purchase the related investment is decreased by the amount of the premium received. If a call a Fund purchased is exercised by it, the amount it pays to purchase the related investment is increased by the amount of the premium it paid. If a put a Fund purchased is exercised by it, the amount it receives on its sale of the related investment is reduced by the amount of the premium it paid. If a call or put written by a Fund expires, it has a gain in the amount of the premium; if that Fund enters into a closing transaction, it will have a gain or loss depending on whether the premium was more or less than the cost of the closing transaction.

Each Fund prices foreign securities in terms of U.S. dollars at the official exchange rate. Alternatively, a Fund may price these securities at the average of the current bid and asked price of such currencies against the dollar last quoted by a major bank that is a regular participant in the foreign exchange market, or on the basis of a pricing service that takes into account the quotes provided by a number of such major banks. If a Fund does not have either of these alternatives available to it or the alternatives do not provide a suitable method for converting a foreign currency into U.S. dollars, the Board of Trustees in good faith will establish a conversion rate for such currency.

Generally, U.S. Government securities and other fixed income securities complete trading at various times prior to the close of the NYSE. For purposes of computing NAV per share, each Fund uses the market value of such securities as of the time its trading day ends. Occasionally, events affecting the value of such securities may occur between such times and the close of the NYSE, which events will not be reflected in the computation of a Fund’s NAV per share. It is currently the policy of each Fund that events affecting the valuation of Fund securities occurring between such times and the close of the NYSE, if material, may be reflected in such NAV per share.

Foreign securities trading may not take place on all days when the NYSE is open, or may take place on Saturdays and other days when the NYSE is not open and a Fund’s NAV per share is not calculated. When determining NAV per share, each Fund values foreign securities primarily listed and/or traded in foreign markets at their market value as of the close of the last primary market where the securities traded. Securities trading in European countries and Pacific Rim countries are normally completed well before 4:00 P.M. Eastern time. It is currently the policy of each Fund that events affecting the valuation of Fund

securities occurring between the time its NAV per share is determined and the close of the NYSE, if material, may be reflected in such NAV per share.

Each Fund reserves the right to suspend or postpone redemptions during any period when: (a) trading on the NYSE is restricted, as determined by the SEC, or that the NYSE is closed for other than customary weekend and holiday closings; (b) the SEC has by order permitted such suspension; or (c) an emergency, as determined by the SEC, exists, making disposal of portfolio securities or valuation of net assets of a Fund not reasonably practicable.

SHAREHOLDER SERVICES

Systematic Withdrawal Plan. A Systematic Withdrawal Plan is available for shareholders having shares of a Fund with a minimum value of \$10,000, based upon the NAV per share with respect to the Fund. The Systematic Withdrawal Plan provides for monthly or quarterly redemptions in any amount not less than \$100 (which amount is not necessarily recommended).

The Transfer Agent acts as agent for the shareholder in redeeming sufficient full and fractional shares to provide the amount of the periodic withdrawal payment. The Systematic Withdrawal Plan may be terminated at any time, and, while no fee is currently charged, each Fund reserves the right to initiate a fee of up to \$5 per withdrawal, upon 30 days' written notice to the shareholder.

Withdrawal payments should not be considered as dividends, yield, or income. If periodic withdrawals continuously exceed reinvested dividends and capital gains distributions, the shareholder's original investment will be correspondingly reduced and ultimately exhausted.

Furthermore, each withdrawal constitutes a redemption of shares, and any gain or loss realized must be recognized for federal income tax purposes. The shareholder may purchase additional shares when participating in the Systematic Withdrawal Plan.

Automatic Investment Plan. A shareholder who wishes to make additional investments in a Fund on a regular basis may do so by authorizing the Transfer Agent to deduct a fixed amount each month from the shareholder's checking account at his or her bank. This amount will automatically be invested in that Fund on the same day that the preauthorized debit is issued. The shareholder will receive a confirmation from the Fund, and the bank account statement will show the amount charged. The form necessary to begin this service is available from the Transfer Agent.

Tax Sheltered Retirement Plans. Through the Distributor, retirement plans are either available or expected to be available for use by the self-employed (Keogh Plans), Individual Retirement Accounts (including SEP-IRAs) and "tax-sheltered accounts" under Section 403(b)(7) of the Code. Adoption of such plans should be on advice of legal counsel or tax advisers.

For further information regarding plan administration, custodial fees and other details, investors should contact the Distributor.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation

of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Funds' Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Asset Control (OFAC), and a complete and thorough review of all new opening account applications. The Funds will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

TAXES

General

Each Fund has elected to qualify and intends to continue to qualify annually for tax treatment applicable to regulated investment companies under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). The discussion that follows is not intended to be a complete discussion of present or proposed federal income tax laws and the effect of such laws on an investor. Investors are urged to consult with their tax advisers for a complete review of the tax consequences of an investment in a Fund.

If a Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such that Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Distributions to shareholders, whether from that Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of that Fund.

If, as expected, a Fund qualifies as a regulated investment company, dividends from a Fund's net investment income, including short-term capital gains, are taxable to shareholders as ordinary income, while distributions of net capital gains are taxable as long-term capital gains regardless of the shareholder's holding period for the shares. Such dividends and distributions are taxable to shareholders whether received in cash or reinvested in additional shares. Since all or substantially all of the income of each Fund is derived from interest payments to it, none of the dividends of a Fund are expected to qualify for the intercorporate dividends received deduction or the reduced rate for qualified dividend income.

Any dividend or capital gain distribution paid shortly after a purchase of shares of a Fund, will have the effect of reducing the NAV per share of such shares by the amount of the dividend or distribution. Furthermore, if the NAV per share of a Fund immediately after a dividend or distribution is less than the cost of such shares to the shareholder, the dividend or distribution will be taxable to the shareholder even though it results in a return of capital to him.

Redemptions of shares will generally result in a capital gain or loss for income tax purposes. Such capital gain or loss will be long term or short term, depending upon the shareholder's holding period for the shares. However, if a loss is realized on shares held for six months or less, and the investor received a capital gain distribution during that period, then such loss is treated as a long-term capital loss to the extent of the capital gain distribution received.

Rule 17a-7 Transactions

The Trust has adopted procedures pursuant to Rule 17a-7 under the 1940 Act (“Rule 17a-7”) pursuant to which each Fund may effect a purchase and sale transaction with an affiliated person of the Fund (or an affiliated person of such an affiliated person) in which a Fund issues its shares in exchange for securities which are permitted investments for a Fund. For purposes of determining the number of shares to be issued, the securities to be exchanged will be valued in accordance with Rule 17a-7. Certain of the transactions may be tax-free with the result that a Fund acquires unrealized appreciation. Most Rule 17a-7 transactions will be taxable.

Taxation of Hedging Instruments

If a call option written by a Fund expires, the amount of the premium received by the Fund for the option will be short-term capital gain. If a Fund enters into a closing transaction with respect to the option, any gain or loss realized by the Fund as a result of the transaction will be short-term capital gain or loss. If the holder of a call option exercises the holder’s right under the option, any gain or loss realized by a Fund upon the sale of the underlying security or futures contract pursuant to such exercise will be short-term or long-term capital gain or loss to the Fund depending on the Fund’s holding period for the underlying security or futures contract, and the amount of the premium received will be added to the proceeds of sale for purposes of determining the amount of the capital gain or loss.

With respect to call options purchased by each Fund, a Fund will realize short-term or long-term capital gain or loss if such option is sold and will realize short-term or long-term capital loss if the option is allowed to expire depending on the Fund’s holding period for the call option. If such a call option is exercised, the amount paid by a Fund for the option will be added to the basis of the security or futures contract so acquired.

Gains and losses resulting from the expiration, exercise or closing of futures contracts will be treated as long-term capital gain or loss to the extent of 60% thereof and short-term capital gain or loss to the extent of 40% thereof (hereinafter “blended gain or loss”) for determining the character of distributions. In addition, futures contracts held by a Fund on the last day of a fiscal year will be treated as sold for market value (“marked to market”) on that date, and gain or loss recognized as a result of such deemed sale will be blended gain or loss. The realized gain or loss on the ultimate disposition of the futures contract will be increased or decreased to take into consideration the prior marked to market gains and losses.

Each Fund may acquire put options. Under the Code, put options on securities are taxed similar to short sales. If the Fund owns the underlying security or acquires the underlying security before closing the option position, the option positions may be subject to certain modified short sale rules. If a Fund exercises or allows a put option to expire, the Fund will be considered to have closed a short sale. A Fund will generally have a short-term gain or loss on the closing of an option position. The determination of the length of the holding period is dependent on the holding period of the security used to exercise that put option. If a Fund sells the put option without exercising it, its holding period will be the holding period of the option.

Foreign Taxes

Each Fund may be subject to foreign withholding taxes on income and gains derived from their investments outside the U.S. Such taxes would reduce the return on a Fund’s investments. Tax treaties between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of a Fund’s total assets at the close of any taxable year consist of securities of foreign corporations, the

Fund may elect, for U.S. federal income tax purposes, to treat any foreign country income or withholding taxes paid by a Fund that can be treated as income taxes under U.S. income tax principles, as paid by its shareholders subject to certain exceptions for qualified fund of funds structures. For any year that a Fund makes such an election, each of its shareholders will be required to include in his income (in addition to taxable dividends actually received) his allocable share of such taxes paid by the Fund and will be entitled, subject to certain limitations, to credit his portion of these foreign taxes against his U.S. federal income tax due, if any, or to deduct it (as an itemized deduction) from his U.S. taxable income, if any. Generally, credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his foreign source taxable income.

If the pass through election described above is made, the source of a Fund's income flows through to its shareholders. Certain gains from the sale of securities and currency fluctuations will not be treated as foreign source taxable income. In addition, this foreign tax credit limitation must be applied separately to certain categories of foreign source income, one of which is foreign source "passive income." For this purpose, foreign "passive income" includes dividends, interest, capital gains and certain foreign currency gains. As a consequence, certain shareholders may not be able to claim a foreign tax credit for the full amount of their proportionate share of the foreign tax paid by a Fund.

The foreign tax credit can be used to offset only 90% of the alternative minimum tax (as computed under the Code for purposes of this limitation) imposed on corporations and individuals. If a Fund does not make the pass through election described above, the foreign taxes it pays will reduce its income, and distributions by the Fund will be treated as U.S. source income.

Each shareholder will be notified within 60 days after the close of a Fund's taxable year whether, pursuant to the election described above, the foreign taxes paid by the Fund will be treated as paid by its shareholders for that year and, if so, such notification will designate: (i) such shareholder's portion of the foreign taxes paid; and (ii) the portion of the Fund's dividends and distributions that represent income derived from foreign sources.

Backup Withholding

Federal law requires each Fund to withhold as backup withholding currently at the rate of 28% of a non-corporate shareholder's reportable payments (which include dividends, capital gains distributions and redemption proceeds) for shareholders who have not properly certified that the social security or other taxpayer identification number they provide is correct and that the shareholder is not subject to backup withholding, or if such shareholder or the Internal Revenue Service notifies a Fund that backup withholding is required. Back-up withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate federal income tax liability if proper documentation is provided.

GENERAL INFORMATION

The Declaration of Trust permits the Board to issue an unlimited number of full and fractional shares of beneficial interest and to divide or combine the shares into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in a Fund. Each share represents an interest in a Fund proportionately equal to the interest of each other share. Upon a Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

With respect to each Fund, the Trust may offer more than one class of shares. The Trust has reserved the right to create and issue additional series or classes. Each share of a series or class represents an equal

proportionate interest in that series or class with each other share of that series or class. Currently, the High Yield Fund has two classes of shares and the High Yield (MACS) Fund has one class of shares.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust which are not attributable to a specific series or class are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares have no pre-emptive or conversion rights. Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Trustees, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more Trustees. Shareholders also have, in certain circumstances, the right to remove one or more Trustees without a meeting. No material amendment may be made to the Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment. The Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a Shareholder Servicing Agent may vote any shares as to which such Shareholder Servicing Agent is the agent of record and which are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such Shareholder Servicing Agent is the agent of record. Any shares so voted by a Shareholder Servicing Agent will be deemed represented at the meeting for purposes of quorum requirements. Shares have no preemptive or conversion rights. Shares, when issued, are fully paid and non-assessable, except as set forth below. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two-thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

The Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, Trustees, officers, employees and agents covering possible tort and other liabilities. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Trust itself was unable to meet its obligations.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act (the "Rule") provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the Rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by

one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

In addition to cash purchases, Fund shares may be purchased by tendering payment in-kind in the form of bonds or other securities. Any securities used to buy Fund shares must be readily marketable, their acquisition consistent with a Fund's objective and otherwise acceptable to the Adviser and the Board.

The Funds do not intend to redeem shares in any form except cash. The Trust, however, has filed a notice of election under Rule 18f-1 of the 1940 Act that allows the Funds to redeem in-kind redemption requests of a certain amount. Specifically, if the amount you are redeeming is over the lesser of \$250,000 or 1% of a Fund's net assets, the Funds have the right to redeem your shares by giving you the amount that exceeds \$250,000 or 1% of a Fund's net assets in securities instead of cash. The securities distributed in-kind would be readily marketable and would be valued for this purpose using the same method employed in calculating the Fund's NAV per share. If a shareholder receives redemption proceeds in-kind, the shareholder should expect to incur transaction costs upon the disposition of the securities received in the redemption.

CODE OF ETHICS

The Trust, the Adviser and the Distributor have adopted separate codes of ethics pursuant to Rule 17j-1 under the 1940 Act. Subject to certain conditions, each code of ethics permits access persons subject thereto to invest in securities, including securities that may be purchased or held by the Funds. Each code of ethics generally prohibits, among other things, access persons subject thereto from purchasing or selling securities if they know at the time of such purchase or sale that the security is being considered for purchase or sale by a Fund or is being purchased or sold by a Fund.

FINANCIAL STATEMENTS

Investors in the Funds will be informed of the Funds' progress through periodic reports. Financial statements certified by an independent registered public accounting firm will be submitted to shareholders at least annually. Since the Funds recently commenced operations, no financial statements are available.

APPENDIX A Description of Ratings

The Funds may invest in securities rated by Standard & Poor's Corporation (Standard & Poor's), Moody's Investors Service, Inc. ("Moody's"), Duff & Phelps Credit Rating Co. ("Duff & Phelps") or IBAC. A brief description of the rating symbols and their meanings follows:

Standard & Poor's Commercial Paper Ratings. A Standard & Poor's commercial paper rating is a current assessment of the likelihood of timely payment of debt considered-term in the relevant market. Ratings are graded into several categories, ranging from A-1 for the highest quality obligations to D for the lowest. These categories are as follows:

A-1. This highest category indicates that the degree of safety regarding timely payment is strong. Those issuers determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-2. Capacity for timely payment on issues with this designation is satisfactory. However the relative degree of safety is not as high as for issuers designed “A-1”.

A-3. Issues carrying this designation have adequate capacity for timely payment. They are, however, more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designation.

Moody’s Short-Term Debt Ratings. Moody’s short-term debt ratings are opinions of the ability of issuers to repay punctually senior debt obligations which have an original maturity not exceeding one year. Obligations relying upon support mechanisms such as letters-of-credit and bonds of indemnity are excluded unless explicitly rated.

Moody’s employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

Prime-1. Issuers rated Prime-1 (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structure with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Prime-2. Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Prime-3. Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

STANDARD & POOR’S RATINGS FOR BONDS

AAA Debt rated AAA has the highest rating assigned by Standard & Poor’s. Capacity to pay interest and repay principal is extremely strong.

AA Debt rated AA has a very strong capacity to pay interest and repay principal and differs from

the higher rated issues only in small degree.

- A Debt rated A has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.
- BBB Debt rated BBB is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.
- BB, B, CCC, CC, C Debt rated “BB,” “B,” “CCC,” “CC” and “C” is regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. “BB” indicates the least degree of speculation and “C” the highest. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major exposure to adverse conditions.
- BB Debt rated “BB” has less near-term vulnerability to default than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial or economic conditions which would lead to inadequate capacity to meet timely interest and principal payments. The “BB” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “BBB” or “BBB”- rating.
- B Debt rated “B” has a greater vulnerability to default but currently has the capacity to meet interest payments and principal repayments. Adverse business, financial or economic conditions will likely impair capacity or willingness to pay interest and repay principal. The “B” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “BB” or “BB”- rating.
- CCC Debt rated “CCC” has a currently identifiable vulnerability to default, and is dependent upon favorable business, financial and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial or economic conditions, it is not likely to have the capacity to pay interest and repay principal. The “CCC” rating category is also used for debt subordinated to senior debt that is assigned an actual or implied “B” or “B”- rating.
- CC The rating “CC” typically is applied to debt subordinated to senior debt that is assigned an actual or implied “CCC” or “CCC”- rating.
- C The rating “C” typically is applied to debt subordinated to senior debt that is assigned an actual or implied “CC” or “CC”- debt rating. The “C” rating may be used to cover a situation where bankruptcy petition has been filed, but debt service payments are continued.

STANDARD & POOR’S CHARACTERISTICS OF SOVEREIGN DEBT OF FOREIGN COUNTRIES

- AAA Stable, predictable governments with demonstrated track record of responding flexibly to changing economic and political circumstances.
Prosperous and resilient economies, high per capital incomes.
Low fiscal deficits and government debt, low inflation

Low external debt.

- AA Stable, predictable governments with demonstrated track record of responding flexibly to changing economic and political circumstances.
Tightly integrated into global trade and financial system.
Differ from AAAs only to a small degree because:
- Economies are smaller, less prosperous and generally more vulnerable to adverse external influences (*e.g.*, protection and terms of trade shocks)
 - More variable fiscal deficits, government debt and inflation.
 - Moderate to high external debt.
- A Politics evolving toward more open, predictable forms of governance in environment of rapid economic and social change.
Established trend of integration into global trade and financial system.
Economies are smaller, less prosperous and generally more vulnerable to adverse external influences (*e.g.*, protection and terms of trade shocks).
Usually rapid growth in output and per capita incomes.
Manageable through variable fiscal deficits, government debt and inflation.
Usually low but variable debt.
- BBB Political factors a source of significant uncertainty, either because system is in transition or due to external threats, or both, often in environment of rapid economic and social change.
Integration into global trade and financial system growing but untested.
Economies less prosperous and often more vulnerable to adverse external influences.
Variable to high fiscal deficits, government debt and inflation.
High and variable external debt.
- BB Political factors a source of major uncertainty, either because system is in transition or due to external threats, or both, often in environment of rapid economic and social change.
Integration into global trade and financial system growing but untested.
Low to moderate income developing economies, but variable performance and quite vulnerable to adverse external influences.
Variable to high fiscal deficits, government debt and inflation.
Very high and variable debt, often graduates of Brady Plan but track record not well established.

MOODY'S RATINGS FOR BONDS

- Aaa Bonds which are rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt-edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.
- Aa Bonds which are rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the Aaa securities.

- A Bonds which are rated A possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future.
- Baa Bonds which are rated Baa are considered as medium grade obligations (*i.e.*, they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.
- Ba Bonds which are rated Ba are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.
- B Bonds which are rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.
- Caa Bonds which are rated Caa are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.
- Ca Bonds which are rated Ca represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.
- C Bonds which are rated C are the lowest rated class of bonds and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Fitch, Inc. Bond Rating Definitions

AAA-Bonds considered to be investment grade and of the highest credit quality. The obligor has an exceptionally strong ability to pay interest and repay principal, which is unlikely to be affected by reasonably foreseeable events.

AA-Bonds considered to be investment grade and of very high credit quality. The obligor's ability to pay interest and repay principal is very strong, although not quite as strong as bonds rated "AAA." Because bonds rated in the "AAA" and "AA" categories are not significantly vulnerable to foreseeable future developments, short-term debt of these issuers is generally rated "F-1+."

A-Bonds considered to be investment grade and of high credit quality. The obligor's ability to pay interest and repay principal is considered strong, but may be more vulnerable to adverse changes in economic conditions and circumstances than bonds with higher ratings.

BBB-Bonds considered to be investment grade and of satisfactory credit quality. The obligor's ability to pay interest and repay principal is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to have adverse impact on these bonds, and therefore impair timely payment. The likelihood that the ratings of these bonds will fall below investment grade is higher than for bonds with higher ratings.

APPENDIX B
PACIFIC INCOME ADVISERS, INC. (“the Adviser”)
PROXY VOTING POLICY
2010

On January 31, 2003, the SEC approved proxy voting regulations for investment advisers registered with the SEC under the Advisers Act. The regulations require investment advisers to disclose their proxy voting policies and procedures to their clients.

1. VOTING PROXIES FOR NON-ERISA ACCOUNTS

In this regard, it is the Adviser’s policy to vote proxies for portfolio securities in accordance with the best economic interests of each client unless that client explicitly retains responsibility for proxy voting.

2. VOTING OF PROXIES FOR ERISA ACCOUNTS

The Department of Labor (“DOL”) takes the position that the fiduciary act of managing plan assets which are held as shares of corporate stock includes the obligation to vote proxies appurtenant to those shares of stock. Section 403(a) of Employee Retirement Income Security Act of 1974 (“ERISA”) requires plan trustees to have exclusive authority and responsibility for voting proxies, unless:

- The plan expressly provides that the trustees are subject to the discretion of a named fiduciary who is not a trustee (in which case the trustees are subject to proper directions made in accordance with the terms of the plan and not contrary to ERISA); and
- The authority to manage, acquire or dispose of assets of the plan is delegated to one or more investment managers pursuant to Section 402 of ERISA.

3. PROCEDURES

The Adviser has adopted the following procedures in relation to the voting of proxies:

- At the opening of each client relationship, the RIA responsible for the client will determine whether the Adviser will have proxy voting responsibility and if so whether the client has any specific guidelines or policies it requires the Adviser to comply with.
- All investment advisory agreements with clients specify whether the Adviser, the client or (in the case of ERISA Accounts) the plan trustees or a named fiduciary have proxy voting authority. All agreements with Wrap-Fee sponsors provide that the Adviser has proxy voting authority unless the client explicitly retains responsibility for proxy voting in writing.
- All proxy voting materials received by the Adviser will be forwarded to Operations whose responsibilities will include but not be limited to:
 - (i) Reconciliation of proxies received against securities held and obtaining any missing proxy materials/ballots prior to the voting deadline.
 - (ii) Forwarding all applicable proxy materials to those clients who have retained authority to vote proxies.

- (iii) Voting proxies in accordance with the Compliance Committee's recommendations and guidelines.
 - (iv) Transmitting voted proxies to the appropriate issuers.
 - (v) Recording how each proxy was voted for the Adviser's clients.
 - (vi) Maintaining appropriate proxy voting records by issuer and for clients.
 - (vii) Preparing and providing proxy voting reports to the CCO upon request.
- If any conflict or potential conflict of interest arises in the execution of the Adviser's proxy voting responsibilities, Operations will refer the matter to the Compliance Committee who will review and resolve any such conflict in the best interests of all affected clients. The Compliance Committee will either instruct Operations to vote the affected proxies in accordance with the Compliance Committee's specific instructions or provided that the client is not an ERISA client, either request the client to vote their own proxies or abstain from any voting. In all cases, the Compliance Committee will disclose the conflict to all affected clients and notify them of the specific action taken.
 - The CCO is responsible for ensuring that an accurate summary of the Adviser's proxy voting procedures is included in the Adviser's client disclosure document and on its website at all times.

The Adviser will maintain adequate records to document the voting process for all clients.
